### **Activity Description**

This activity is for E2E troubleshooting and Clearance of RF Reflected Power High alarms 4G cell/ site.

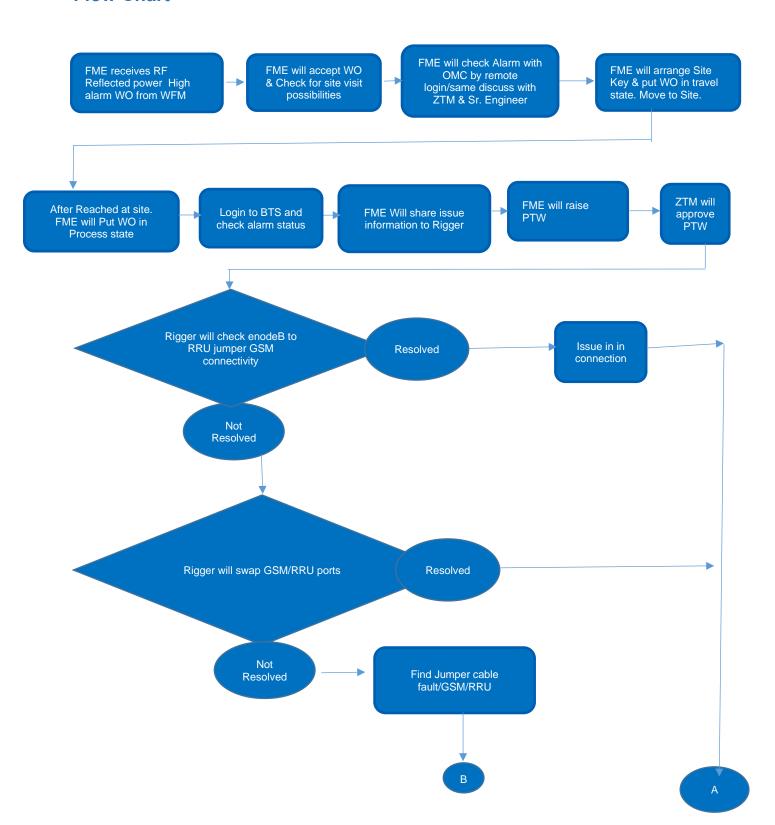

Attached are the details to be followed by RAN Team. As this need to be followed as guideline.

Alarm Name	RF REFLECTED POWER HIGH at ONE FM end
Alarm Description	RF REFLECTED POWER HIGH alarm due issue at RRU / GSM Port and Jumper Cable
	between RRU and GSM
Possible Causes	1. GSM or RRU Port
	2. Jumper Cable fault

## **Activity Summary**

9 FME will check in BTS (Alarm cleared or not) 10 If cleared, then Put WO in closed state		
3 Put WO in travel 4 After reaching site - put WO in process 5 Login the BTS & Check alarm status 6 Raise PTW to ZTM 7 PTW Approval done by ZTM Rigger will Check possible reasons : RRU / GSM Port and Jumper Cable between RRU and GSM 9 FME will check in BTS (Alarm cleared or not) 10 If cleared, then Put WO in closed state If not cleared, then check RRU to GSM Connections (Jumper fault, Damage) and Ports @ FGSM 12 Put Work order in Waiting internal if any HW required at site 13 Raise request for Hardware to BSS Team 14 Once Material received again put WO in Travel mode 15 After reaching site - put WO in process 16 Raise PTW to ZTM 17 PTW Approval done by ZTM 18 Replace the hardware 19 Check from BTS Login that alarm cleared or not after hardware replaced 20 Once Alarm Cleared	1	Corrective WO RF Reflected Power High alarm is received on WFM portal
4 After reaching site - put WO in process 5 Login the BTS & Check alarm status 6 Raise PTW to ZTM 7 PTW Approval done by ZTM Rigger will Check possible reasons : RRU / GSM Port and Jumper Cable between RRU and GSM 9 FME will check in BTS (Alarm cleared or not) 10 If cleared, then Put WO in closed state If not cleared, then check RRU to GSM Connections (Jumper fault, Damage) and Ports @ FGSM 12 Put Work order in Waiting internal if any HW required at site 13 Raise request for Hardware to BSS Team 14 Once Material received again put WO in Travel mode 15 After reaching site - put WO in process 16 Raise PTW to ZTM 17 PTW Approval done by ZTM 18 Replace the hardware 19 Check from BTS Login that alarm cleared or not after hardware replaced 20 Once Alarm Cleared	2	FME will Accept the WO
5 Login the BTS & Check alarm status 6 Raise PTW to ZTM 7 PTW Approval done by ZTM Rigger will Check possible reasons: RRU / GSM Port and Jumper Cable between RRU and GSM 9 FME will check in BTS (Alarm cleared or not) 10 If cleared, then Put WO in closed state If not cleared, then check RRU to GSM Connections (Jumper fault, Damage) and Ports @ R 11 GSM 12 Put Work order in Waiting internal if any HW required at site 13 Raise request for Hardware to BSS Team 14 Once Material received again put WO in Travel mode 15 After reaching site - put WO in process 16 Raise PTW to ZTM 17 PTW Approval done by ZTM 18 Replace the hardware 19 Check from BTS Login that alarm cleared or not after hardware replaced 20 Once Alarm Cleared	3	Put WO in travel
6 Raise PTW to ZTM 7 PTW Approval done by ZTM Rigger will Check possible reasons: RRU / GSM Port and Jumper Cable between RRU and GSM 9 FME will check in BTS (Alarm cleared or not) 10 If cleared, then Put WO in closed state If not cleared, then check RRU to GSM Connections (Jumper fault, Damage) and Ports @ F 11 GSM 12 Put Work order in Waiting internal if any HW required at site 13 Raise request for Hardware to BSS Team 14 Once Material received again put WO in Travel mode 15 After reaching site - put WO in process 16 Raise PTW to ZTM 17 PTW Approval done by ZTM 18 Replace the hardware 19 Check from BTS Login that alarm cleared or not after hardware replaced 20 Once Alarm Cleared	4	After reaching site - put WO in process
7 PTW Approval done by ZTM Rigger will Check possible reasons: RRU / GSM Port and Jumper Cable between RRU and 8 GSM 9 FME will check in BTS (Alarm cleared or not) 10 If cleared, then Put WO in closed state If not cleared, then check RRU to GSM Connections (Jumper fault, Damage) and Ports @ F 11 GSM 12 Put Work order in Waiting internal if any HW required at site 13 Raise request for Hardware to BSS Team 14 Once Material received again put WO in Travel mode 15 After reaching site - put WO in process 16 Raise PTW to ZTM 17 PTW Approval done by ZTM 18 Replace the hardware 19 Check from BTS Login that alarm cleared or not after hardware replaced 20 Once Alarm Cleared	5	Login the BTS & Check alarm status
Rigger will Check possible reasons: RRU / GSM Port and Jumper Cable between RRU and GSM  FME will check in BTS (Alarm cleared or not)  If cleared, then Put WO in closed state  If not cleared, then check RRU to GSM Connections (Jumper fault, Damage) and Ports @ R  GSM  Put Work order in Waiting internal if any HW required at site  Raise request for Hardware to BSS Team  Once Material received again put WO in Travel mode  After reaching site - put WO in process  Raise PTW to ZTM  PTW Approval done by ZTM  Replace the hardware  Check from BTS Login that alarm cleared or not after hardware replaced  Once Alarm Cleared	6	Raise PTW to ZTM
9 FME will check in BTS (Alarm cleared or not) 10 If cleared, then Put WO in closed state	7	PTW Approval done by ZTM
9 FME will check in BTS (Alarm cleared or not) 10 If cleared, then Put WO in closed state		Rigger will Check possible reasons: RRU / GSM Port and Jumper Cable between RRU and
10 If cleared, then Put WO in closed state  If not cleared, then check RRU to GSM Connections (Jumper fault, Damage) and Ports @ R 11 GSM  12 Put Work order in Waiting internal if any HW required at site 13 Raise request for Hardware to BSS Team 14 Once Material received again put WO in Travel mode 15 After reaching site - put WO in process 16 Raise PTW to ZTM 17 PTW Approval done by ZTM 18 Replace the hardware 19 Check from BTS Login that alarm cleared or not after hardware replaced 20 Once Alarm Cleared	8	GSM
If not cleared, then check RRU to GSM Connections (Jumper fault, Damage) and Ports @ R GSM  12 Put Work order in Waiting internal if any HW required at site  13 Raise request for Hardware to BSS Team 14 Once Material received again put WO in Travel mode 15 After reaching site - put WO in process 16 Raise PTW to ZTM 17 PTW Approval done by ZTM 18 Replace the hardware 19 Check from BTS Login that alarm cleared or not after hardware replaced 20 Once Alarm Cleared	9	FME will check in BTS (Alarm cleared or not)
11 GSM 12 Put Work order in Waiting internal if any HW required at site 13 Raise request for Hardware to BSS Team 14 Once Material received again put WO in Travel mode 15 After reaching site - put WO in process 16 Raise PTW to ZTM 17 PTW Approval done by ZTM 18 Replace the hardware 19 Check from BTS Login that alarm cleared or not after hardware replaced 20 Once Alarm Cleared	10	If cleared, then Put WO in closed state
12 Put Work order in Waiting internal if any HW required at site 13 Raise request for Hardware to BSS Team 14 Once Material received again put WO in Travel mode 15 After reaching site - put WO in process 16 Raise PTW to ZTM 17 PTW Approval done by ZTM 18 Replace the hardware 19 Check from BTS Login that alarm cleared or not after hardware replaced 20 Once Alarm Cleared		If not cleared, then check RRU to GSM Connections (Jumper fault, Damage) and Ports @ RRU /
13 Raise request for Hardware to BSS Team 14 Once Material received again put WO in Travel mode 15 After reaching site - put WO in process 16 Raise PTW to ZTM 17 PTW Approval done by ZTM 18 Replace the hardware 19 Check from BTS Login that alarm cleared or not after hardware replaced 20 Once Alarm Cleared	11	GSM
14 Once Material received again put WO in Travel mode 15 After reaching site - put WO in process 16 Raise PTW to ZTM 17 PTW Approval done by ZTM 18 Replace the hardware 19 Check from BTS Login that alarm cleared or not after hardware replaced 20 Once Alarm Cleared	12	Put Work order in Waiting internal if any HW required at site
15 After reaching site - put WO in process 16 Raise PTW to ZTM 17 PTW Approval done by ZTM 18 Replace the hardware 19 Check from BTS Login that alarm cleared or not after hardware replaced 20 Once Alarm Cleared	13	Raise request for Hardware to BSS Team
16 Raise PTW to ZTM  17 PTW Approval done by ZTM  18 Replace the hardware  19 Check from BTS Login that alarm cleared or not after hardware replaced  20 Once Alarm Cleared	14	Once Material received again put WO in Travel mode
17 PTW Approval done by ZTM 18 Replace the hardware 19 Check from BTS Login that alarm cleared or not after hardware replaced 20 Once Alarm Cleared	15	After reaching site - put WO in process
18 Replace the hardware 19 Check from BTS Login that alarm cleared or not after hardware replaced 20 Once Alarm Cleared	16	Raise PTW to ZTM
19 Check from BTS Login that alarm cleared or not after hardware replaced 20 Once Alarm Cleared	17	PTW Approval done by ZTM
20 Once Alarm Cleared	18	Replace the hardware
	19	Check from BTS Login that alarm cleared or not after hardware replaced
21 EME will close the WO as resolved	20	Once Alarm Cleared
21   Tivit will close tile wo as resolved	21	FME will close the WO as resolved

#### **Activity Details**

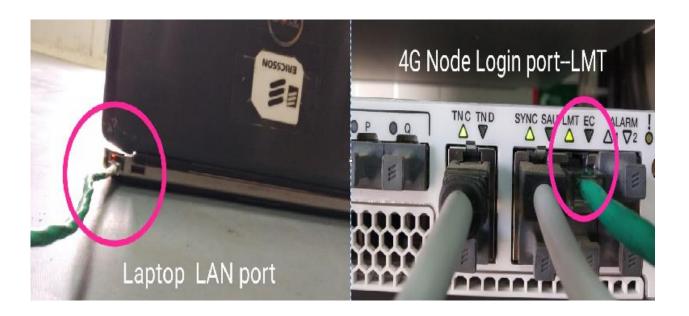

#### Pre requisites:

- 1) SVD WO for Time Sync Reference Failed alarm.
- 2) Alarm on OneFM /WFM.

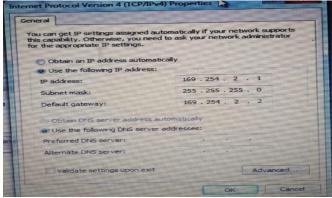

When RF Reflected Power High Alarms reflects,

Below the activities need to be done step by step to clear the alarm

a) Login in 4G BB/ eNodeB as per RAN MOP via LMT OEMS connect using LAN cable

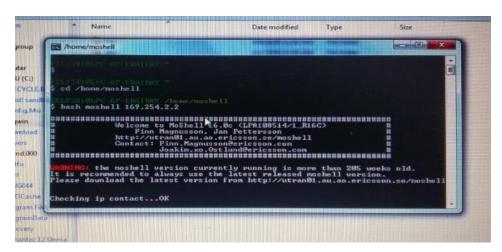

Change the Laptop IP

				• \	. 0,
Prepared (also subject responsible if other)		No.			
Sanjeev Motagi					
Approved	Checked	Date	Rev	Reference	
		23-01-2020	Ver1.0		

#### Login the NodeB

b) Verify the Alarm status: RF Reflected Power High Alarm

```
3214 1 (UNLOCKED) 1 (ENABLED) ENodeBFunction=1,EUtranCellTDD=LHY5732T
3550 1 (UNLOCKED) 1 (ENABLED) ENodeBFunction=1,EUtranCellTDD=LHY5732U
6495 1 (UNLOCKED) SystemFunctions=1,HealthCheckM=1,HcRule=ENodeBFunction_EutranFddCellStatus
6495 1 (UNLOCKED) SystemFunctions=1,HealthCheckM=1,HcRule=ENodeBFunction_EutranFddCellStatus
6497 1 (UNLOCKED) SystemFunctions=1,HealthCheckM=1,HcRule=ENodeBFunction_NbiotCellStatus

### h) If tower work involves, perform PTW

## **Post Analysis**

Step No.	Step Name/Step Type	Command	Field	Mandatory (Y/N)	Expected Result
1	FME will visit the site after 30 minutes to check	As per MOP and run the alarm check command to confirm its Cleared	RAN	Y	As per MOP
2	BSS Team will check after 24 hrs if alarm has reappeared	As per MOP
