

Computer Basics and PC Software Lab

BCSL-13

Question:- Answer the following in the context of the Linux Operating System. You must write all the commands that you have used for answering the questions. Also, attach printout or a file (may be in PDF format) containing the screenshots of the output.

a) Write and run the following Linux commands and attach the screenshots of the output of each commands.

i) who

Answer:- The who command is used to get information about currently logged in user on to system.

Syntax:-

\$who [options] [filename]

Output:-

```
hduser@sumit-Inspiron-3543:~$ who
hduser tty      2018-03-18  19:08(10)
hduser @sumit-Inspiron-3543:~$
```

ii) man

Answer:- Man is a built-in manual for utilizing Linux commands. It permits users to access this reference manual of a utility or a command to execute in the terminal. The man command contains the command description, examples, flags, applicable options, and other informative elements.

Syntax of man: `man [option(s)] keyword`

sssi@javatpoint

ls(1)

User Commands

ls(1)

Name

Is: list directory contents

Synopsis

Is [OPTION]... [FILE]...

DESCRIPTION

List information about the FILES.

Sort entries alphabetically if none of -ftuvsox nor --sort is specified.

mandatory arguments to long options are mandatory for short options too.

-a, --all

do not ignore entries starting with.

-A, --almost-all

do not list implied. and .

--author

iii) cat

Answer: The cat (concatenate) command in Linux displays file contents. It reads one or multiple files and prints their content to the terminal. Cat is used to view file contents, combine files and create new files.

Syntax: cat [options] [file-name]

Output

```
sara@pnap:~$ cat > test1.txt
This is test file # 1.
sara@pnap:~$
```

iv) cp

Answer: This command creates a copy of the 'source_file' at the specified 'destination'. If the destination is a directory, the file is copied into that directory.

Syntax: cp src_file dest_file

Output:

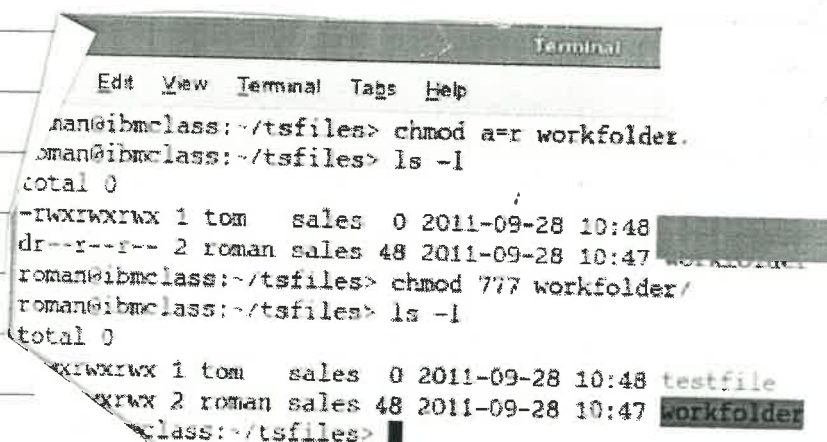

```
administrator@GFG19566-LAPTOP: practice $ ls
a.txt
administrator@GFG19566-LAPTOP: /practice $ cp
a.txt b.txt
administrator@GFG19566: /practice $ ls
a.txt b.txt
```

v) Chmod

Answer: The chmod command is used to be the change the access mode of a file. The name is an abbreviation of change mode.

Syntax: chmod [reference] [operator] [mode] file...

Output:

```
terminal
Edit View Terminal Tabs Help
roman@ibmclass: ~/tsfiles> chmod a=r workfolder.
roman@ibmclass: ~/tsfiles> ls -l
total 0
-rwxrwxrwx 1 tom sales 0 2011-09-28 10:48 [redacted]
dr--r--r-- 2 roman sales 48 2011-09-28 10:47 [redacted]
roman@ibmclass: ~/tsfiles> chmod 777 workfolder/
roman@ibmclass: ~/tsfiles> ls -l
total 0
-rwxrwxrwx 1 tom sales 0 2011-09-28 10:48 testfile
-rwxrwxrwx 2 roman sales 48 2011-09-28 10:47 workfolder
roman@ibmclass: ~/tsfiles>
```

(vi) Is

Answer: - The Is Command is used to display a list of content of a directory.

Syntax: Is

Output:

Javatpoint (a) Javatpoint - Inspiration - 3542: ~\$ Ps

a	Desktop	examples.desktop	music	sample
akash	Directory	hello.c	pico	Snap
a.out	Documents	hello.i	pictures	Templates
composex.phox	downloads	hello.o	project	Test.txt
Demo.sh	eclipse	hello.s	Public	Videos
Demo.txt	Installer	index.html	Python	
Demo.tex~	Workspace	mail	Python-3.8.0	

vii) cmp

Answer: cmp command in Linux/Unix is used to compare the two files byte by byte and helps you to find out whether the two files are identical or not.

Syntax: `cmp [OPTION] -- FILE1 [FILE2 [SKIP1 [SKIP2]]]`

Output:-

// -- cmp command used with -i option ... //

`$ cmp -i 10 file1.txt file2.txt`

`$ -`

* Indicating that both files are identical after 10 bytes skipped from both the files * /

viii) cd

Answer: The 'cd' command allow users to change their current working directory within the file system.

Syntax: `cd [directory]`

Output:-

maghvendra@maghvendra-Inspiron-15-3567:~\$

```
File Edit View Search Terminal Help
maghvendra@maghvendra-Inspiron-15-3567:~$ ls
Desktop  git-hand  music  public  videos
Documents  git_mepos  'my songs'  snap
Downloads  Java2python-0.5.1  pictures  Templates
maghvendra@maghvendra-Inspiron-15-3567:~$ cd Documents
/home/maghvendra/Documents
maghvendra@maghvendra-Inspiron-15-3567:~/Documents$
```

ix) `mkdir`

Answer:- `mkdir` command in Unix allow the user to create directories. This command can create multiple directories at once as well as set the permissions for the directories. It is important to note that the user executing this command must have enough permissions to create a directory in the parent directory, or he/she may receive a 'permission denied' error.

Syntax:- `mkdir <directory Name>`

Output:-

Terminal

```
File Edit View Search Terminal Help
rossoskull@Rossoskull ~/GFG $ mkdir --version
```

- b) Create a text file in Linux consisting of 25 lines. Display the first 4 and last 4 lines of this file. Count how many times the word "the" appeared in this file. Display the file permissions of the file created by you. Now, change the file permissions of this file to `rw-rw----`.

Answer:- To perform the tasks you requested, follow these steps:-

Step 1:- Create a text file with 25 lines. Let's assume the file is named `bsl013.txt`, and its content is as follow:-

Jkhk
 Bmbk
 the
 jhjh
 iww
 hccsh
 sjfkf

Phond
the
hsfs
dlsghf
the
Issl
the
lgldgjod
lgslcb
exulkyds
vhsdkh
fgnoustudy
ksfsa
jksafhf
the
khdgls

Step 2:- Display the first 4 and last 4 lines
of the file using the head and tail commands:

```
$ head -n 4 bcs1013.txt
```

lkhkhk
Bmbk
the
jhjho

```
$ tail -n 4 bcs1013.txt
```

ksfsa
jksafhf
the
khdgls

Step 3:- Count the number of times the word "the" appears in the file using the grep command:-

```
$ grep -o -w "the" bcs1013.txt | wc -l
```

1khhk

Bmbk

the

the

ljldgjisd

ljstfb

exwkkfcs

ignou

helpex

ksfsa

jksafhf

Step 4:- Display the file permissions of bcs1013.txt to rxw-rw-r-- using the chmod command:-

```
$ Is -l bcs1013.txt  
-rw-rw--- 1 IGNOU 147854140 Aug 100.03 bcs1013.txt  
Permission type user
```

Step 5: Change file permissions of bcs1013.txt to rw-rw-- using the chmod command:

We use syntax:
chmod u=rw-, o=--- bcs1013.txt

```
IGNOU@IGNOU-PC MINGW32 ~/Desktop  
$ chmod u=rw-, g=rw-, o=--- bcs1013.txt  
IGNOU@IGNOU-PC MINGW32 ~/Desktop  
$
```

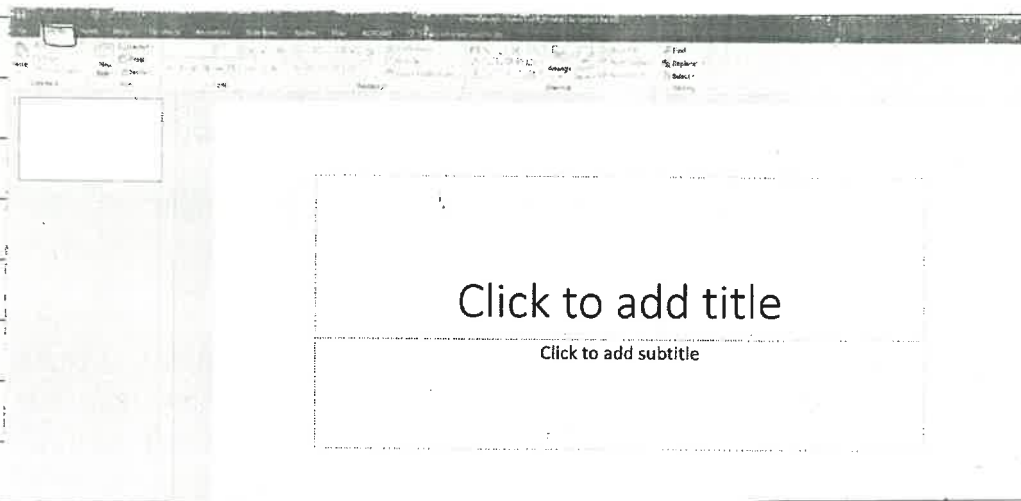

Question: Create a presentation using any Presentation software on the topic "Internet Technologies" (minimum 10 slides) having the following features:

- i) All slides should use a common design template.
- ii) Add an audio file to a slide. Also, add a video file that should run on a full-screen.
- iii) All the slides should have timer-based transitions.
- iv) All the slides should have proper headings and slide notes.
- v) Each slide should have one image related to the topic.

Write the sequence of steps that you have performed to create these slides. Also attach printout OR a file (may be in pdf format) containing the handout of all the slides.

Answer: Creating a presentation on "Internet Technologies" with multimedia and transitions can be straightforward. Here's a step-by-step guide to help you build this in Microsoft PowerPoint, Google slides, or Libre Office Impress.

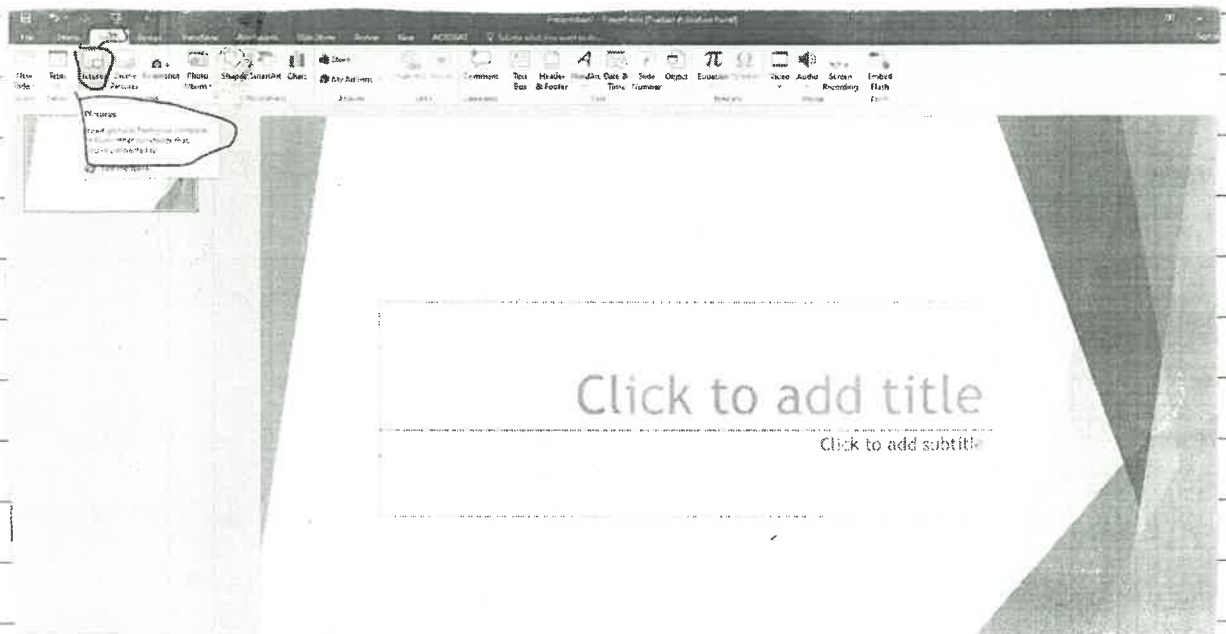

Step 1: Select 'Home' from menu bar and click on 'new slide' option.

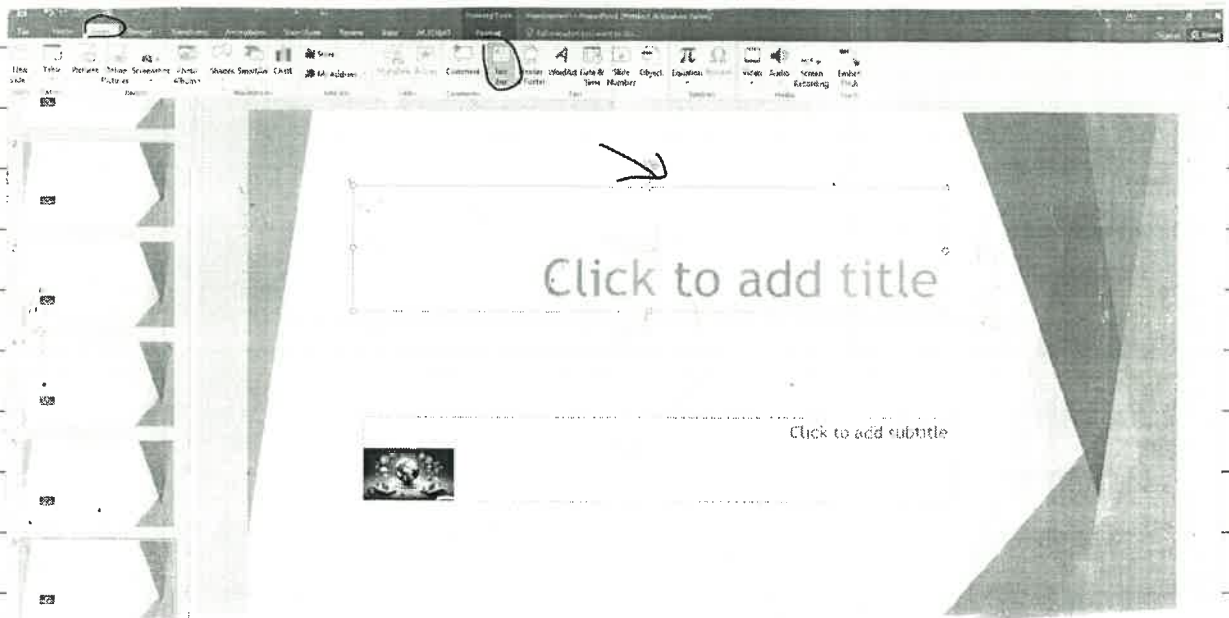

Step 2:- Click on 'Design' from menu bar and select template design as your choice

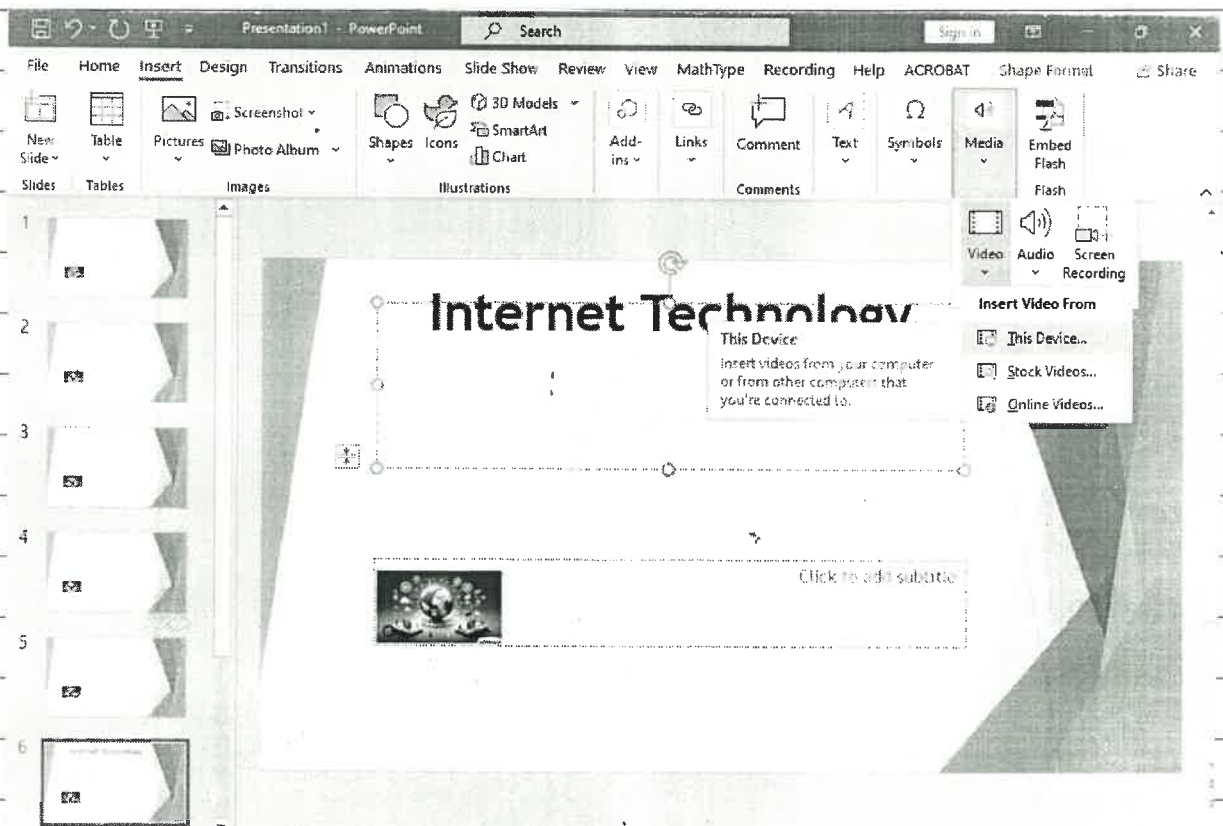

Step 3 :- Click on 'Insert' option from menu bar and click on 'Picture' option for logo.

Step 4 :- Click on 'Insert' option from menu bar and click on 'text box' option for type text.

Step 5:- Select 'Insert' option from menu bar and click on 'video' option for add video clip.

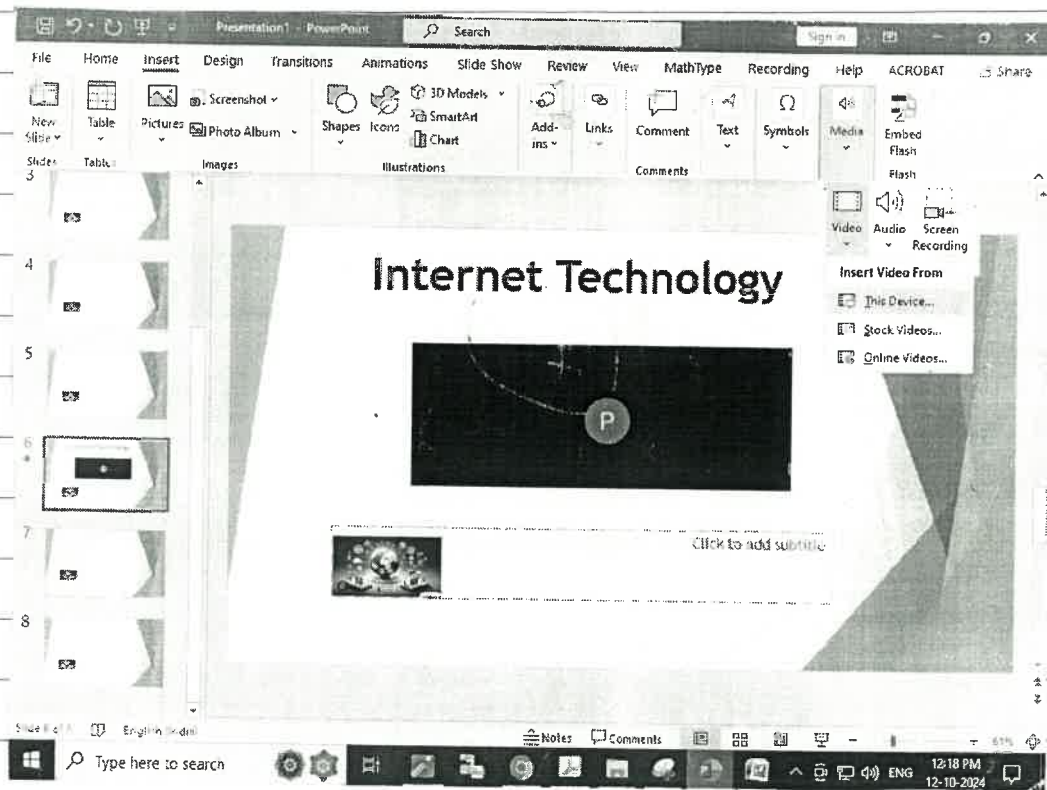

TOPIC _____

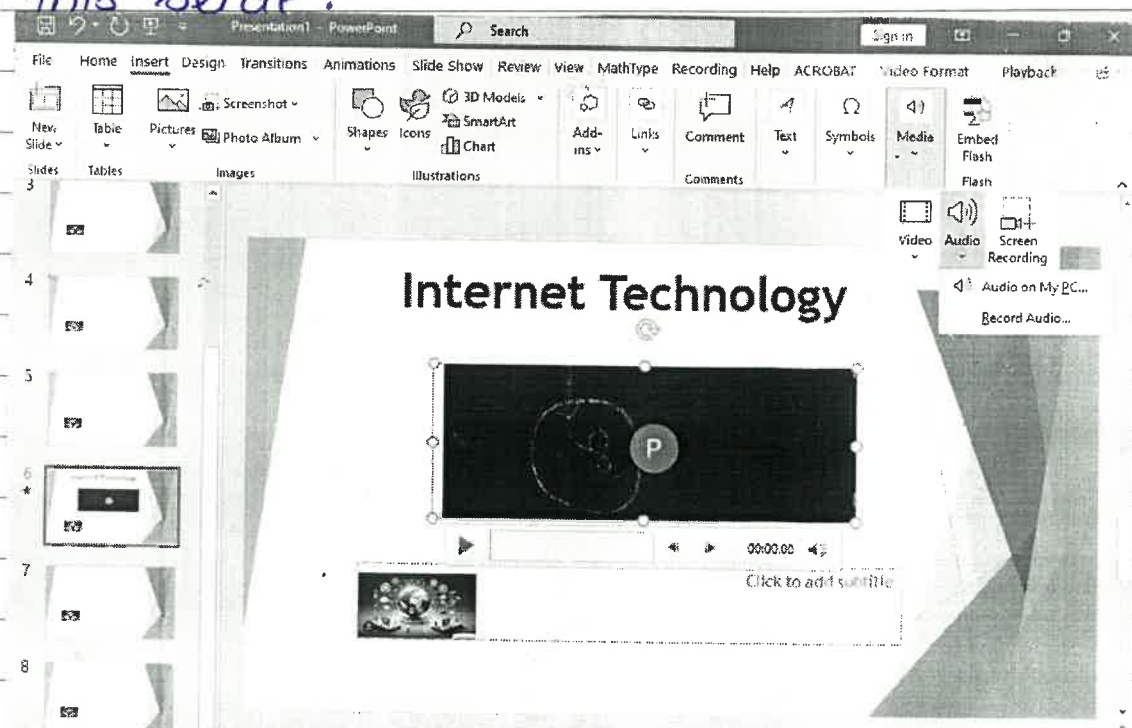

DATE _____

15

Step 6:- Select 'Insert' option from menu bar and click on 'audio' option for add audio clip.

Step 7:- Show here 'video clip' and audio clip' in this slide.

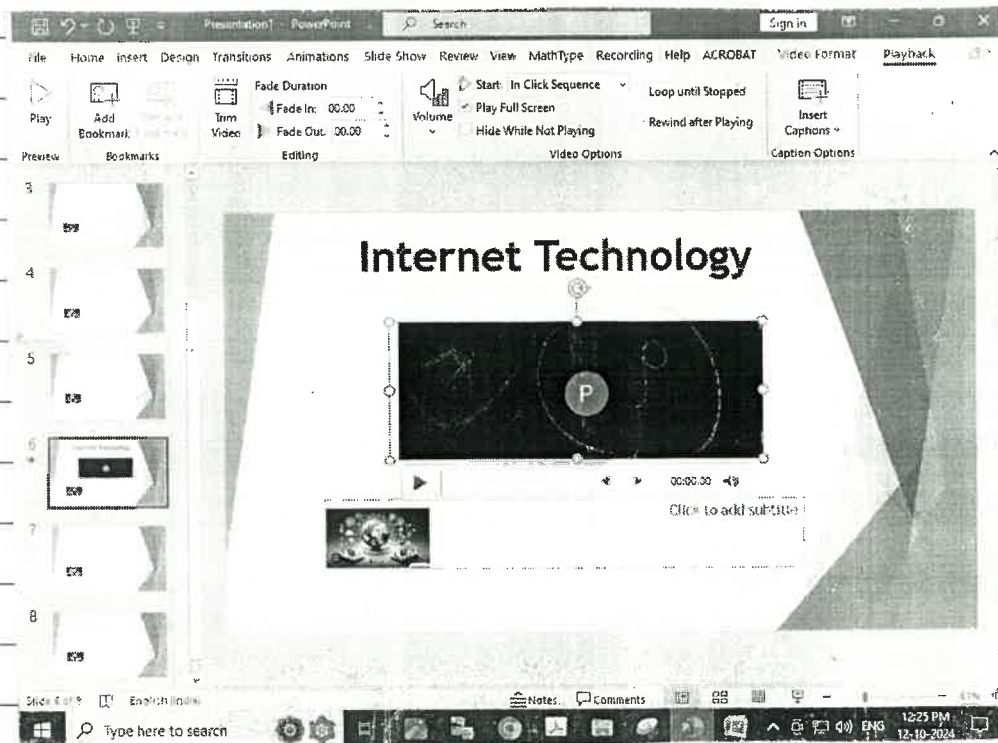

TOPIC _____

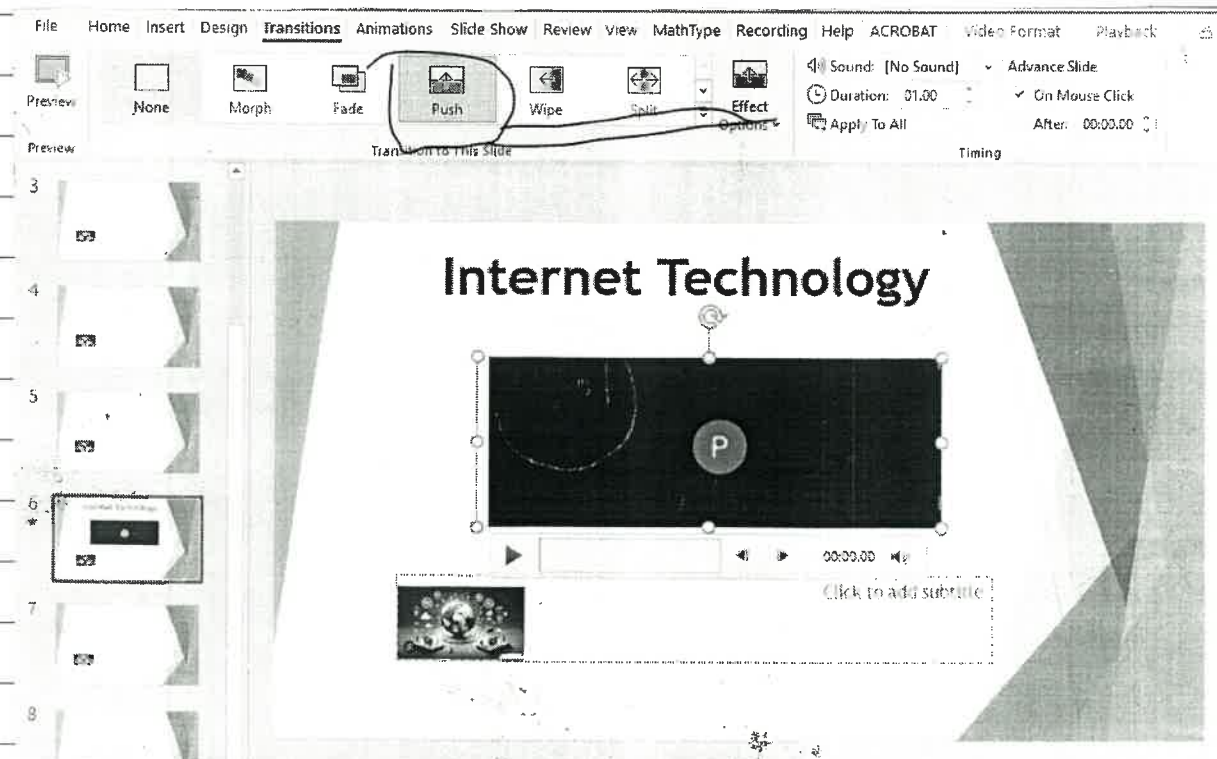

DATE _____

16

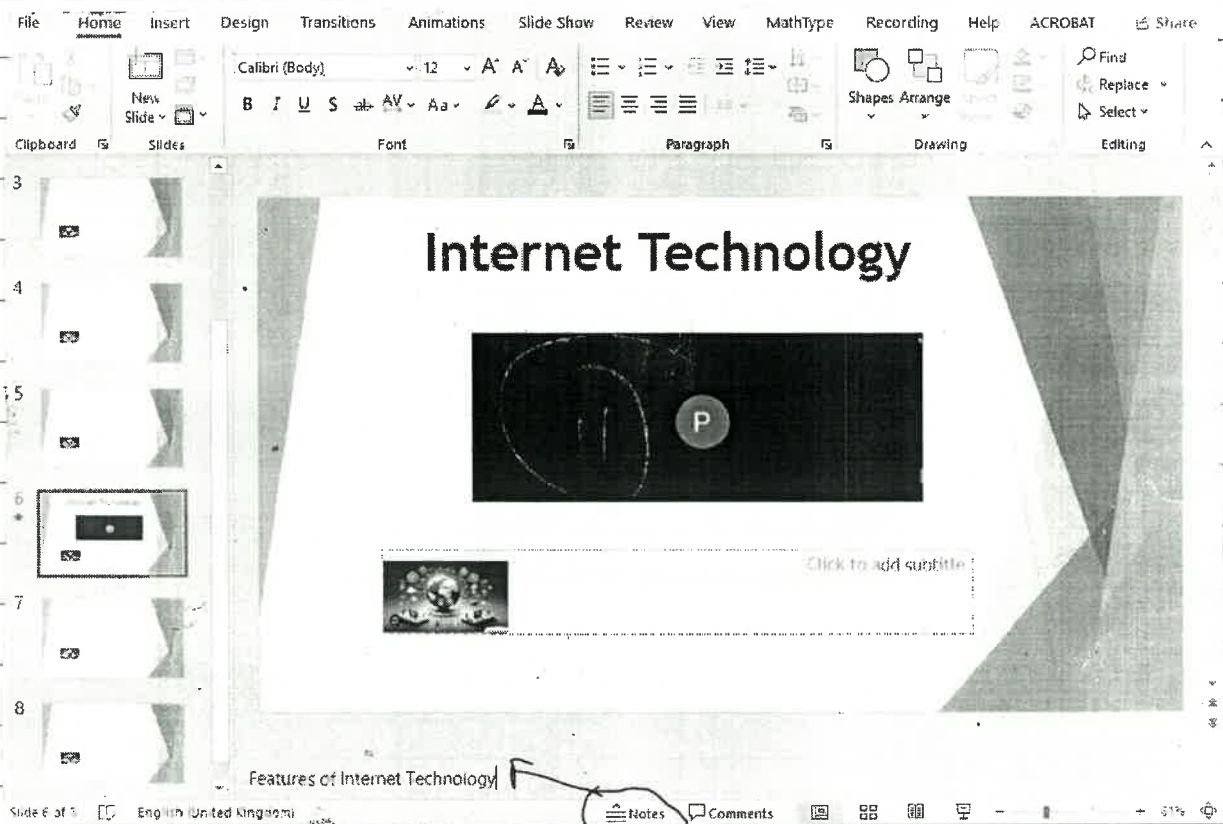

Step 8:- show here 'video clip' play full screen video.

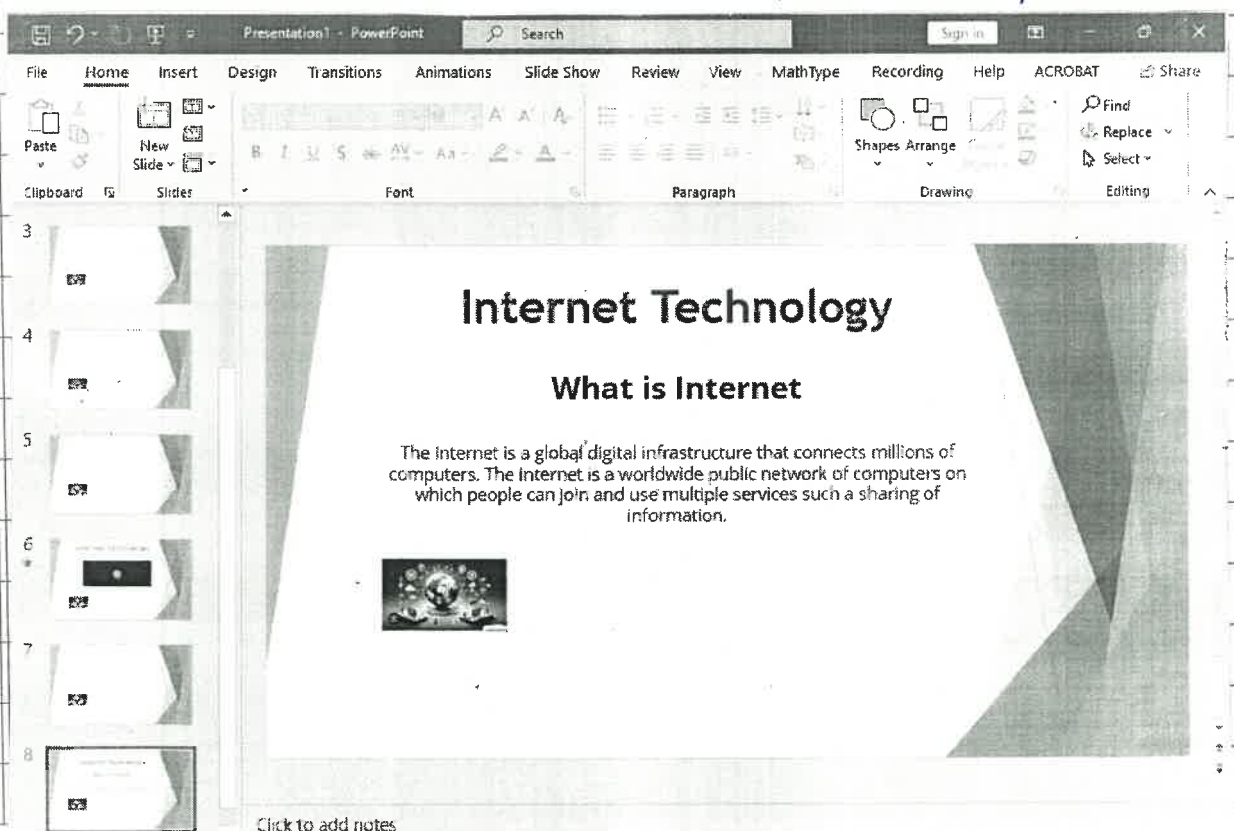

Step 9:- select 'Transition' for slide from transitions bar.

Select 10% - Select all slide and Insert slide notes.

Step 11% - Now our PPT is complete for permission.

Microsoft PowerPoint interface showing a presentation titled "Internet Technology". The slide content is as follows:

Internet Technology

Types of Networks

Local Area Network (LAN): Local Area Network connects computers and devices within a limited geographic area, such as a home, office, or school. LANs offer high data transfer rates, typically ranging from 100 Mbps to 10 Gbps, and have low latency due to the close proximity of connected devices. They usually use Ethernet cables or Wi-Fi for connectivity, making them ideal for sharing resources like files and printers among users in a confined space.

Wide Area Network (WAN): A Wide Area Network extends over large geographic areas, often connecting multiple LANs. WANs typically have lower data transfer rates, ranging from 1 Mbps to 100 Mbps, and can span cities, countries, or even continents. They rely on leased telecommunication lines, utilizing various technologies such as MPLS and VPN. WANs are crucial for businesses with multiple locations, allowing them to communicate and share information across vast distances.

Metropolitan Area Network (MAN): A Metropolitan Area Network covers a larger area than a LAN but is smaller than a WAN, typically serving a city or a large campus. MANs offer moderate data transfer rates, usually between 10 Mbps and 1 Gbps, and often utilize fiber optics or wireless technologies. They are commonly used to connect multiple LANs within a metropolitan area, providing high-speed internet access and services to urban populations.

Microsoft PowerPoint interface showing a presentation titled "Internet Technology". The slide content is as follows:

Internet Technology

What is a website?

A website is a place on the internet where you can easily post information about yourself, your business or topics you're passionate about. It's like having your own corner of the web to showcase your ideas and connect with others. Websites include many business sites, parts of news websites, academic journal websites, gaming websites, file-sharing websites, message boards, web-based email, social networking websites, websites providing real-time stock market data, and websites providing various other services.

Click to add notes

Step 12: Generate a handout (6 slides per page)

Libra office:-

- 1) Go to File > Print
- 2) Under settings, select handouts (6 slides per page).
- 3) Save as Pdf by choosing Microsoft Print to Pdf.

Question:-

- (a) Use a Word Processor to create a document about the topics covered in BCS1013. It should include (i) a multi-level list highlighting the topics and subtopics of the Units (ii) a table consisting of unit number, unit title and number of pages of that unit; (iii) a paragraph-

aph about the objectives of the course.

Answer:- Create a document about the topics covered in BCS1013 using a Word Processor like Microsoft Word, Google Docs, or Libre Office Writer.

Step-by-Step Instructions:-

1) Create the Multi-Level List

Microsoft Word/Libre Office Writer:-

- 1) Open the document and go to section where you want to insert the multi level list.
- 2) Click on the Home tab.
- 3) Click on the Multi level List Icon.
- 4) Start typing your main topic
- 5) Press Enter, and then press Tab to create a sub topic under the main topic.
- 6) Continue this process to outline the topics and sub topics of the Units.

Unit 1 : Introduction

1.1 Overview

1.2 Basic Concepts

~~Step 4:- Change 'font of text' select a text and click on 'Home' and select font your choice.~~

Unit 2 : Advanced Topics

2.1 Detailed Analysis

2.2 Practical Applications

2) Create the Table
Microsoft Word?

- Place the cursor where you want to insert the table.
- Go to the Insert tab and click on Table
- Choose a 3xN table
- Label the columns as Unit Number, Unit Title, and Number of Pages.

Fill in the details for each unit

Unit Number	Unit Title	Number of Pages
1.	Introduction	10
2.	Advanced Topics	15

3) Write the Paragraph About the Objectives of the course.
Microsoft Word / Google Docs / Libre Office Writer?

- 1) Type a heading like Course Objectives
- 2) Below the heading, write a paragraph that describes the objectives of BC!

Paragraph:-

The course BCSL 013 aims to provide a comprehensive understanding of basic and advanced concepts in computer science.

b) Design a flyer on the topic "The Solar Power".

different styles, sizes, fonts colours and effects.

Write the sequence of steps that you have performed to create the document and flyer. Also attach a print out OR a file containing document and flyer.

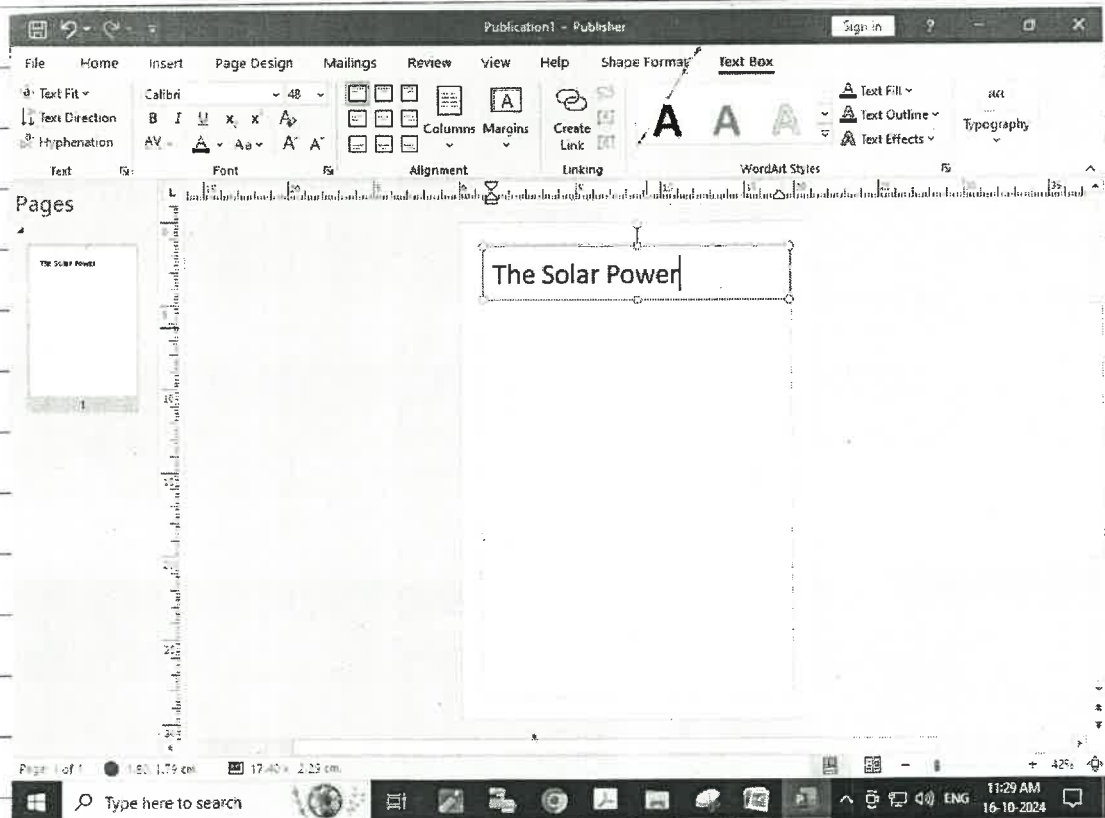

Answer:-

Step 1:- Open Microsoft Office Publisher.

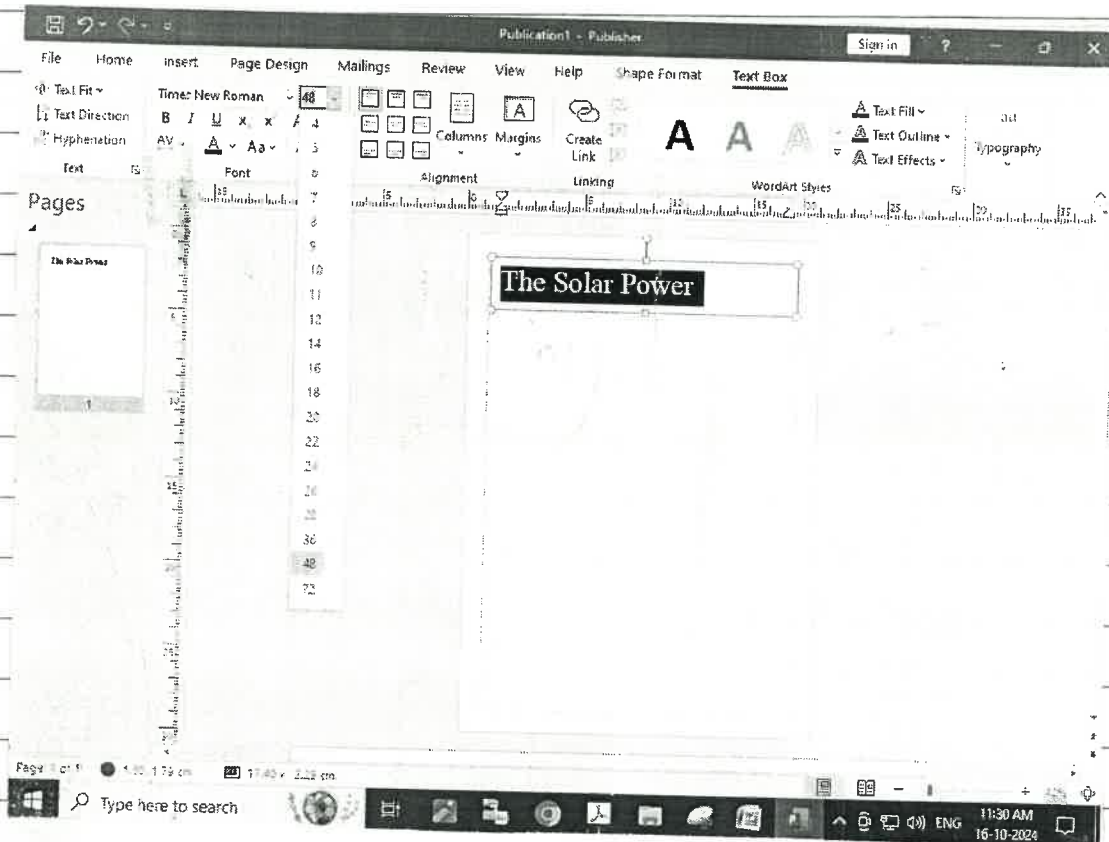

To open it, go to the start menu and on the search bar type "Microsoft Office Publisher". Small window will open to show search result, there you can see 'Microsoft Office Publisher'. Click on it to open and select 'new'.

Step: 2 Select 'Draw Text Box' for type text from Home option from menu bar.

Step 3^o - For "Text" size change select text and select size from "Format" option from menu bar.

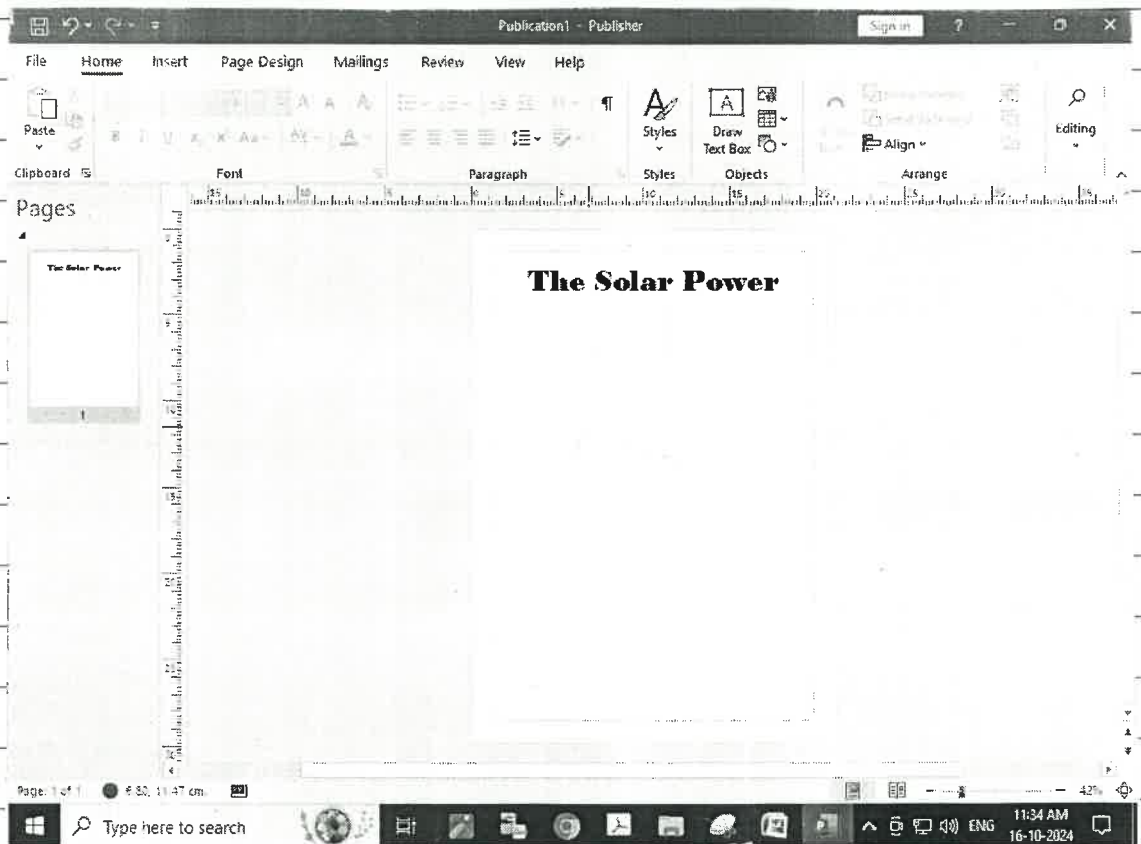

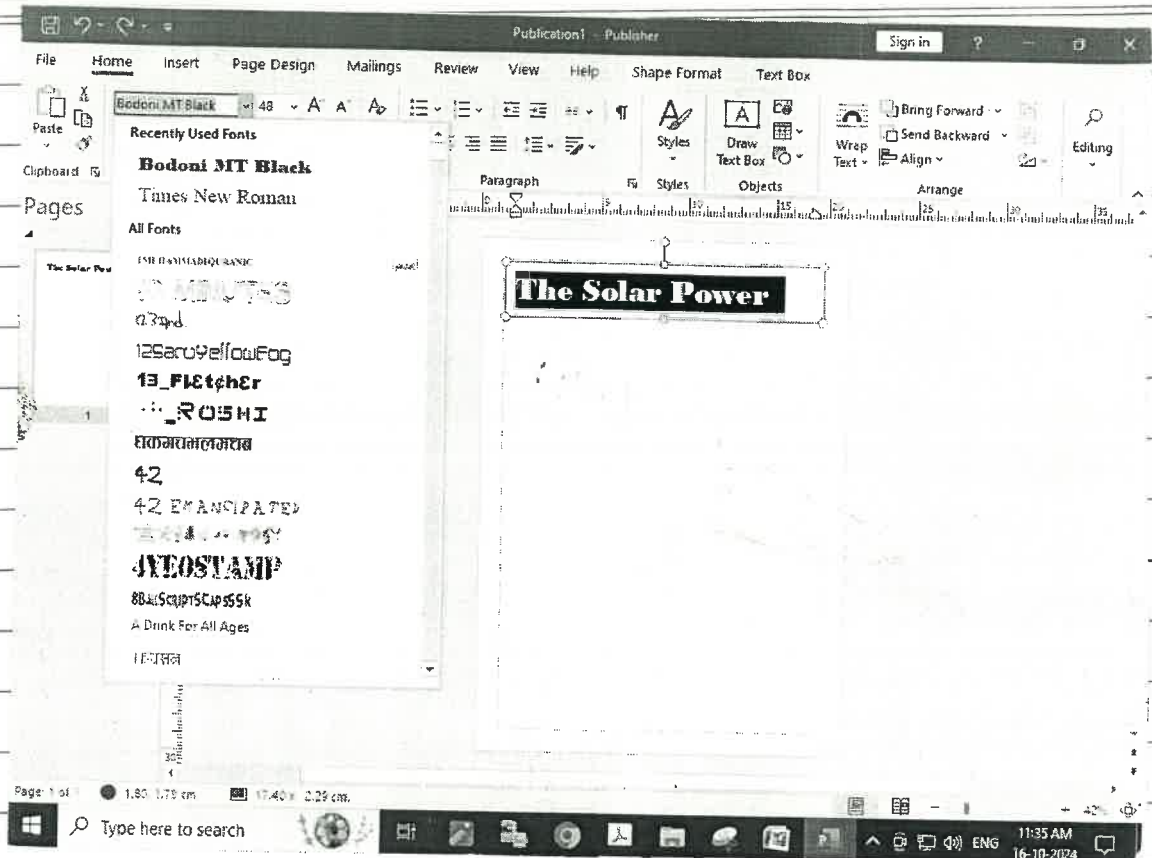

Step 4^o - Change "font of text" select text and click on "Home" and select font your choice.

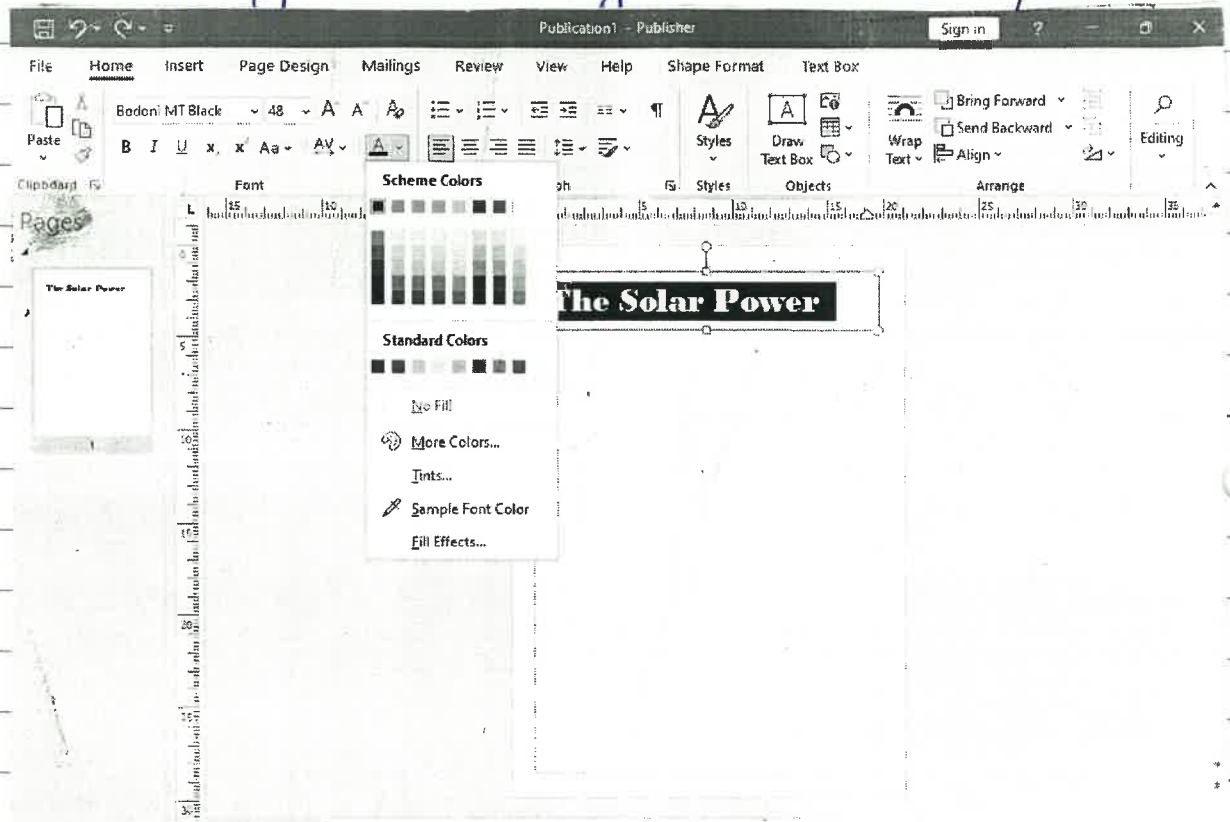

TOPIC _____

DATE _____

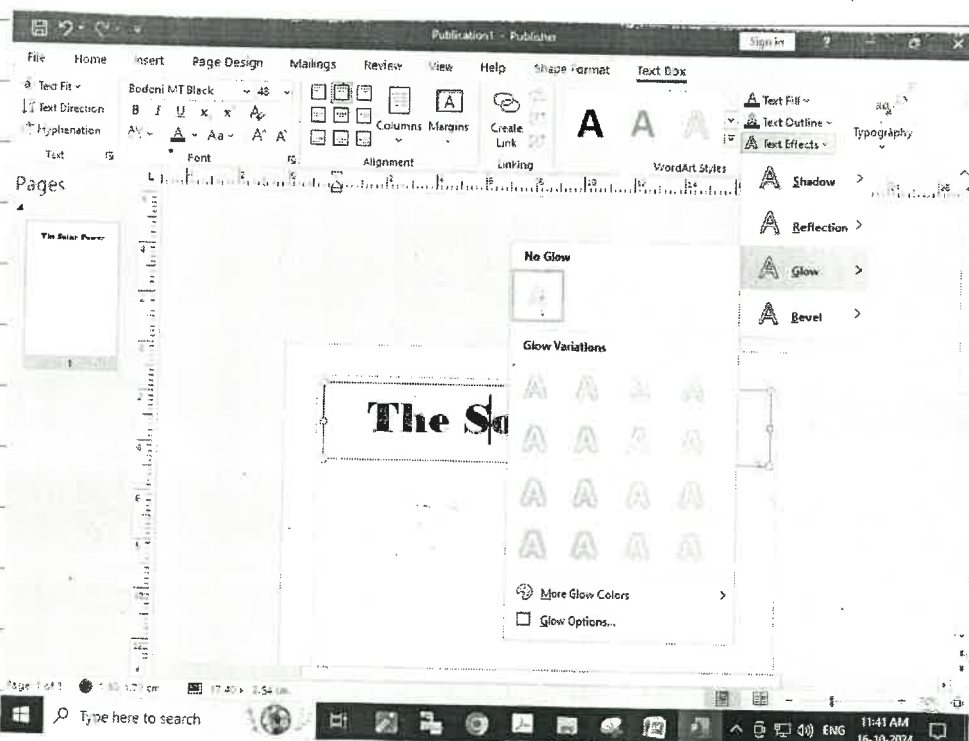

25

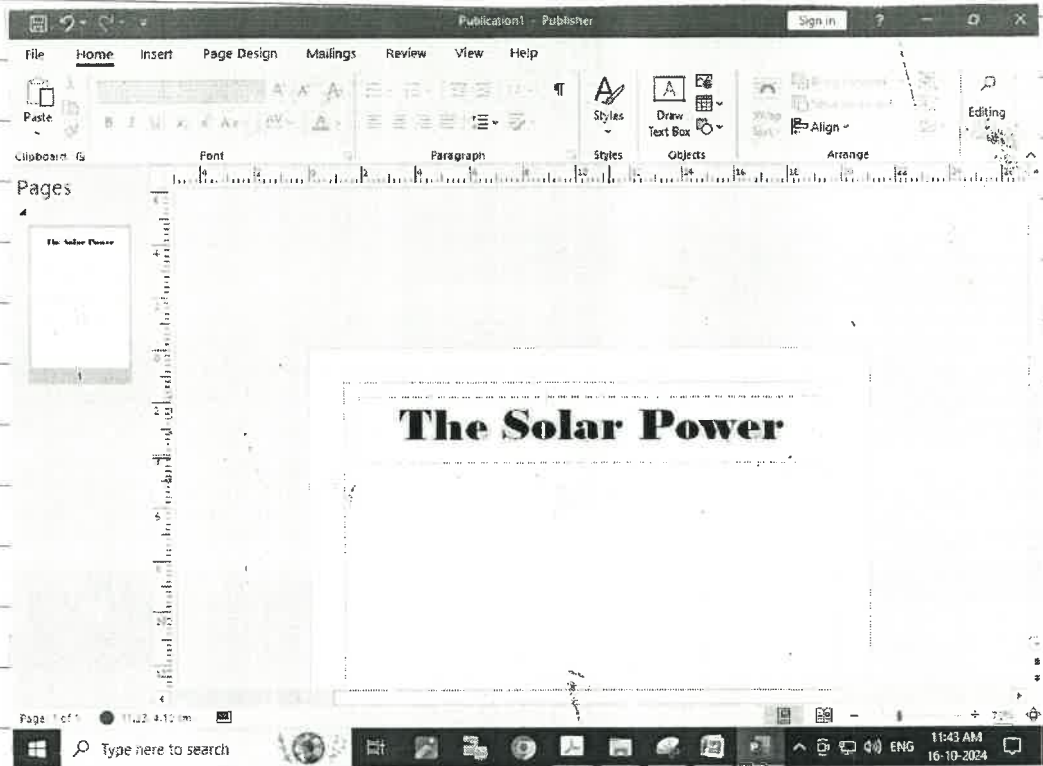

Step 5:- For 'text color' change select text and choose your color from 'home' option.

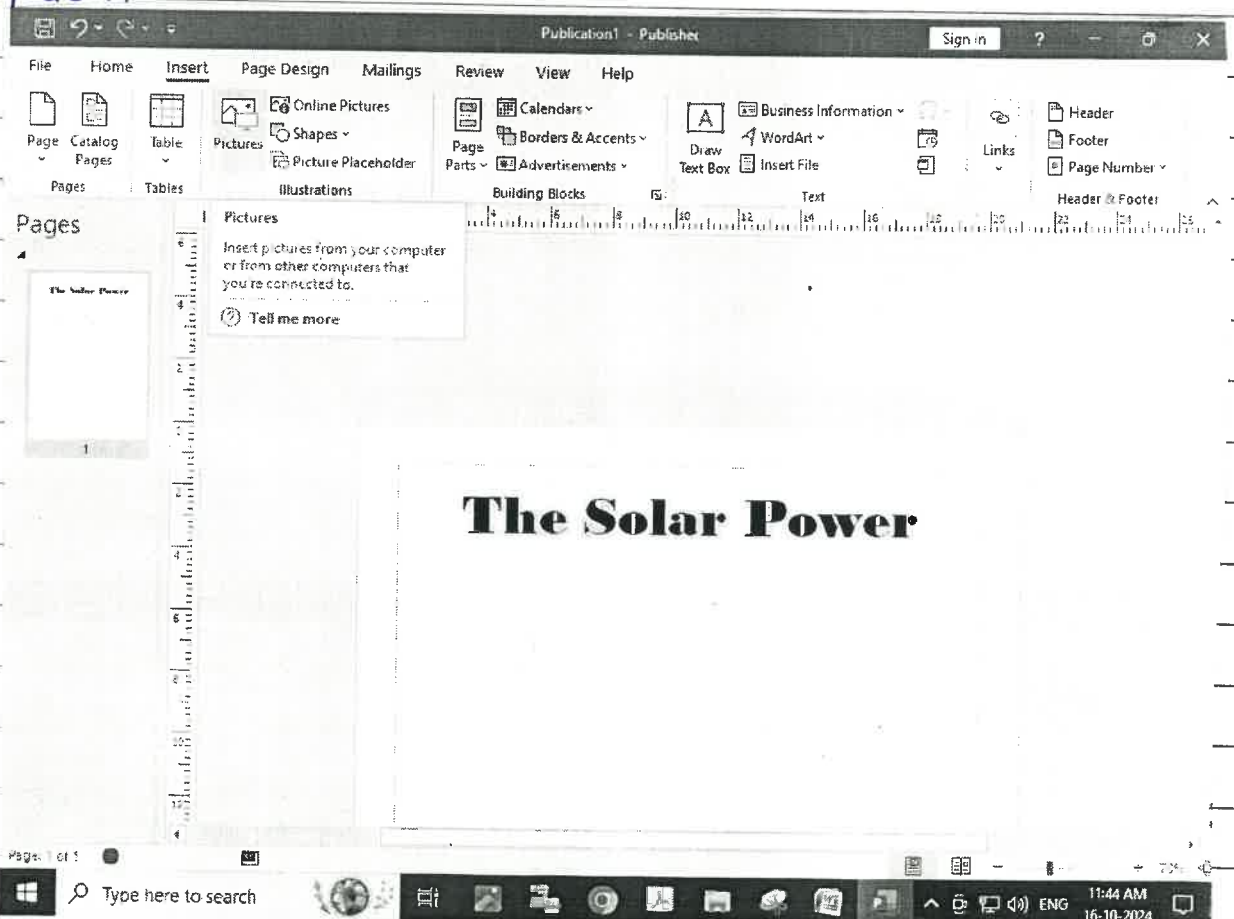

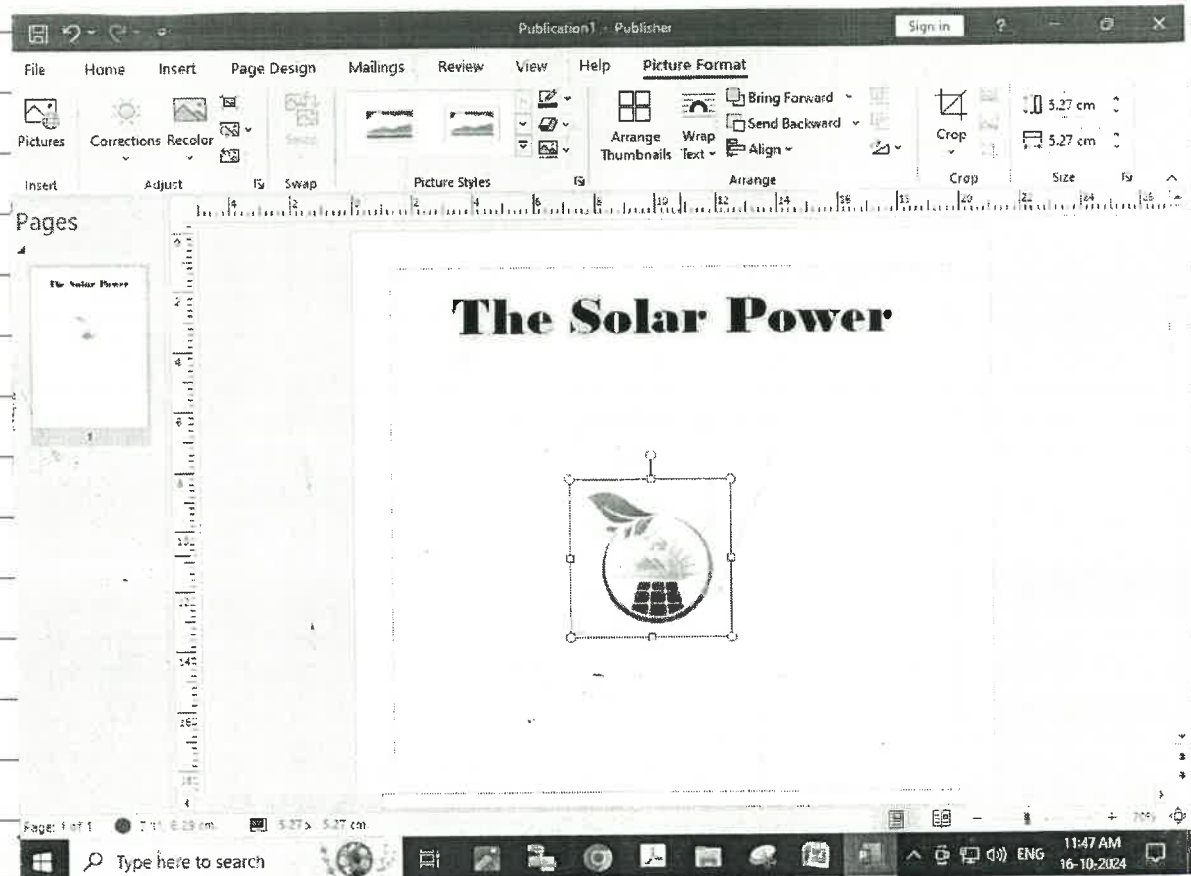

Step 6:- For "text effect" select and click on "Text Box" option in menu and select "Text Effect" choose your choice.

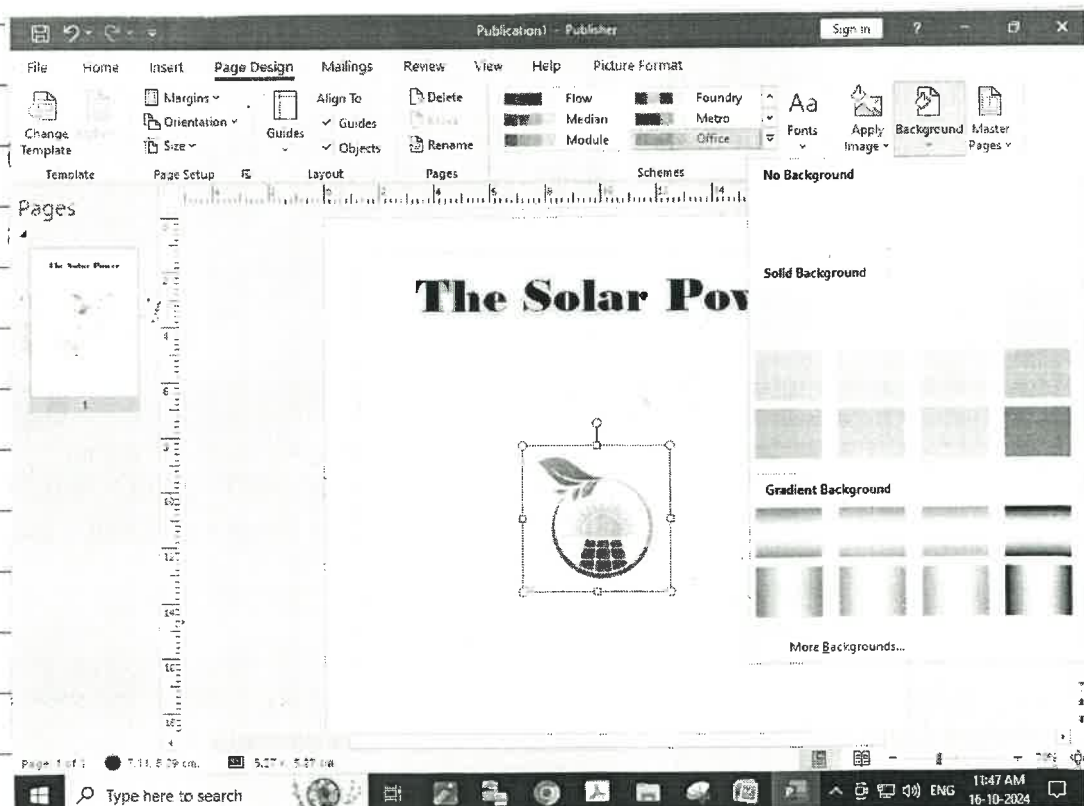

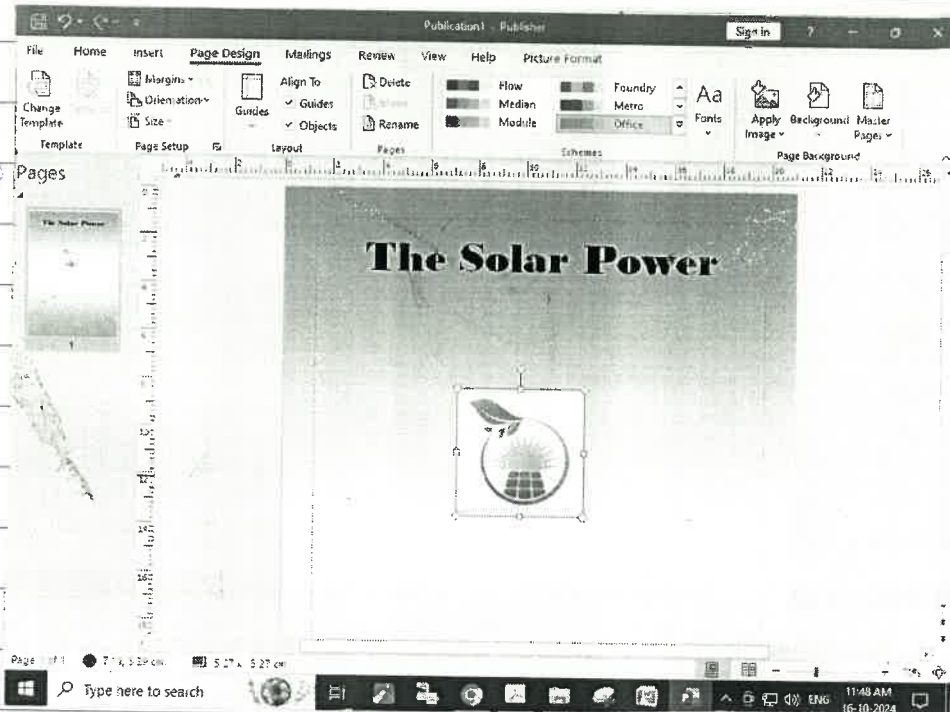

Step 7 :- Select "The Solar Power" picture from 'picture option' from menu and click on Insert option.

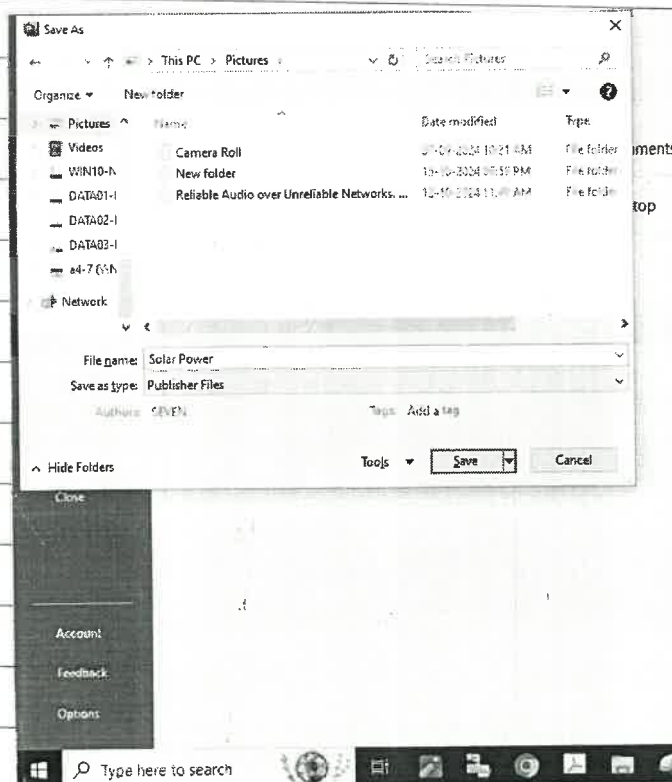

Step 8:- Select 'background' from 'Page Design' option from menu bar and change page style or color.

Step 9:- Save your PowerPoint file as a PDF by clicking "File" > "Save as" > choose "PDF" format. Attach the saved PDF file to your Assignment or submission platform.

4 Question: Create a worksheet containing the payroll of a company as given in the following table:

Employee Name	Basic Salary (B)	DA (30% of B)	Total Gross Salary (G)	IT (25% of G)	PF (10% of G)	Net Salary
Raman	50000					
Mohit	6500					
Singh	60000					
David	50000					
Phillip	4500					
Roger	30000					

You must enter all the labels and details as given above. You may use the following formulae:

$$DA = 30\% \text{ of } B$$

$$G = B + DA$$

$$IT = 25\% \text{ of } G$$

$$PF = 10\% \text{ of } G$$

$$N = B + DA - IT - PF$$

Write the sequence of steps that you have performed to create the formulae in different cells. Also attach printout OR a file (maybe in pdf format) containing the worksheet.

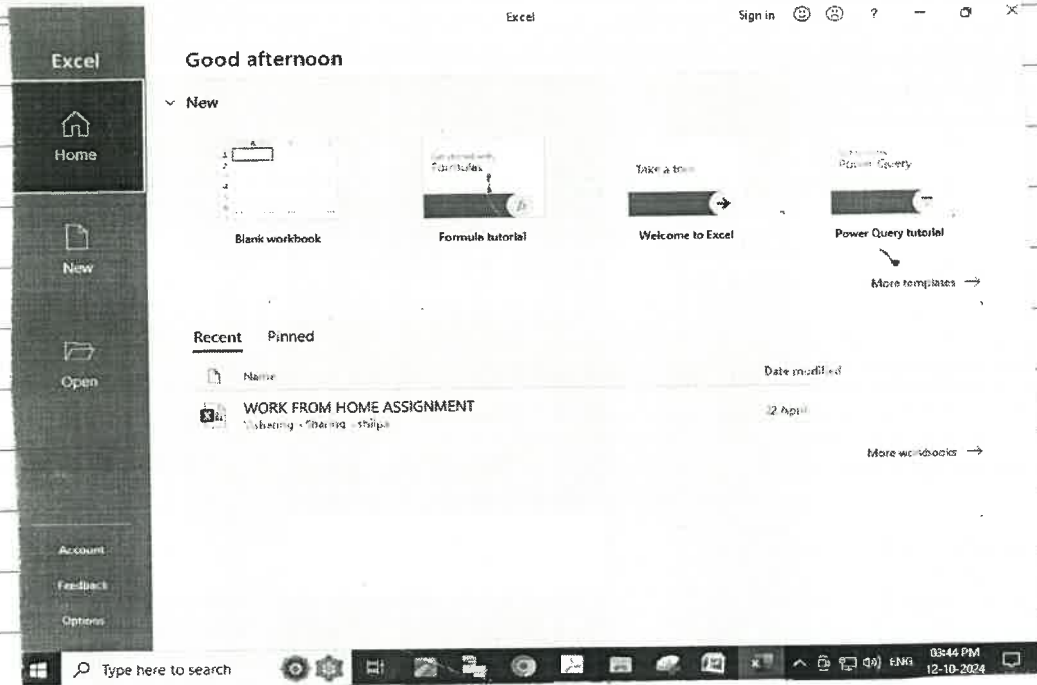

Answer:

Step 1:- Open a blank Excel work book

Question: Use MS Outlook or any other email software to perform the following tasks?

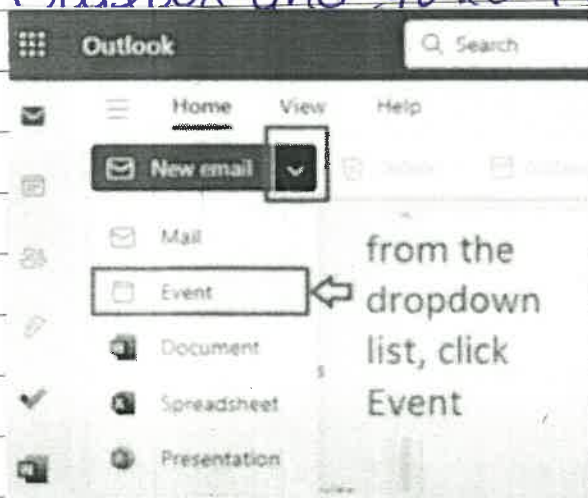

- a) Make a weekly meeting schedule for a group meeting, along with two other BCA students, about the agenda - "Process of Assignment Submission". This weekly meeting should be scheduled for two consecutive weeks.

Answer: A step by step guide on how to perform these requested tasks using Microsoft Outlook or any other email software. I will outline the steps for each task, along with the necessary assumptions and provide instructions on how to create screenshots or save outputs in PDF format.

Task A: Schedule a Weekly Meeting for a Group Meeting Agenda: "Process of Assignment Submission"

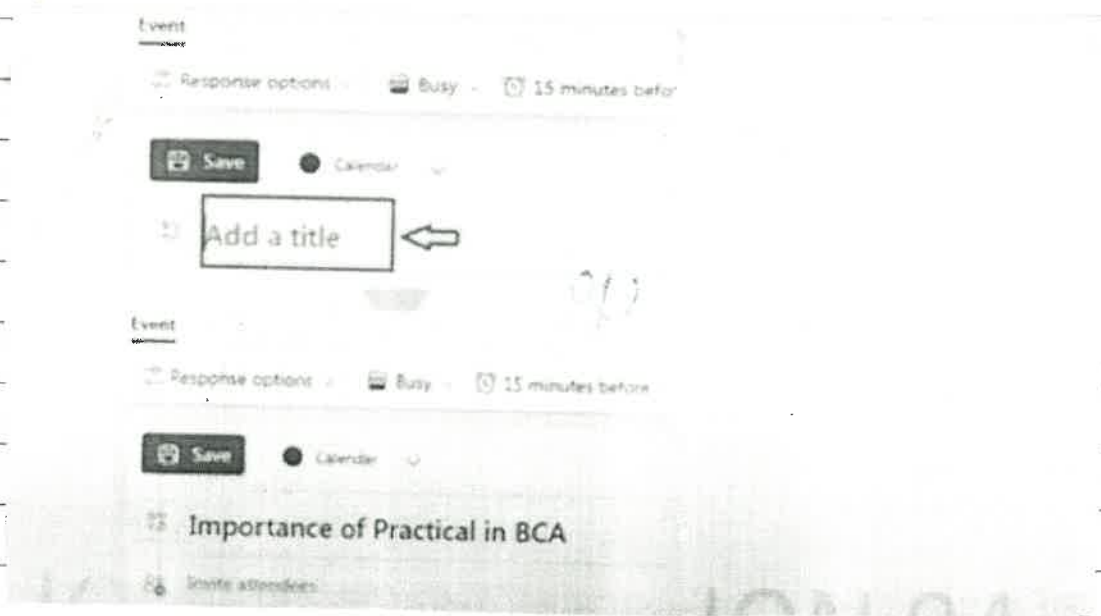

I am using Microsoft Outlook 2013.

- i) Open Outlook and go to Excel.

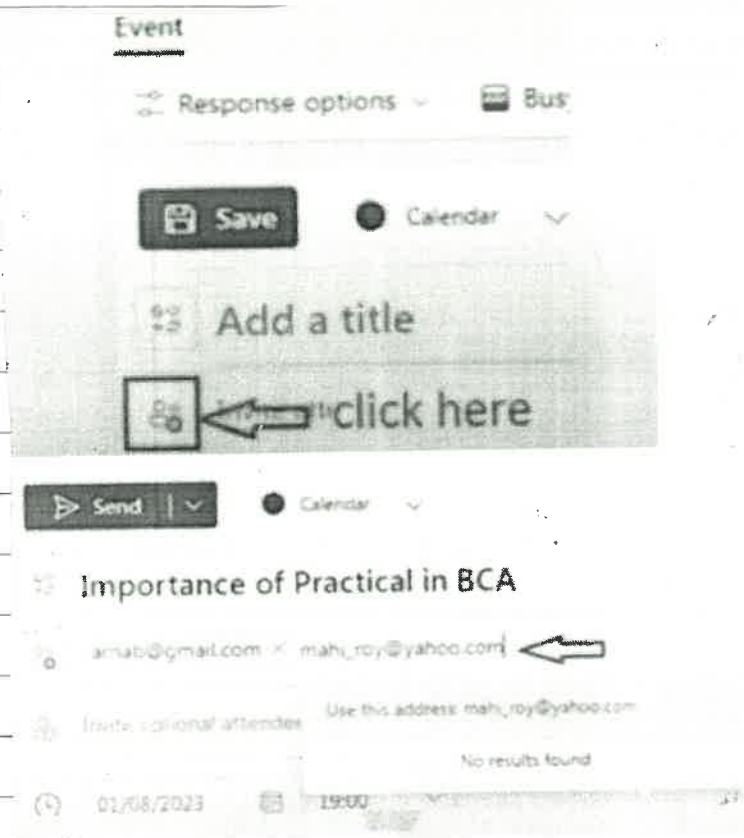

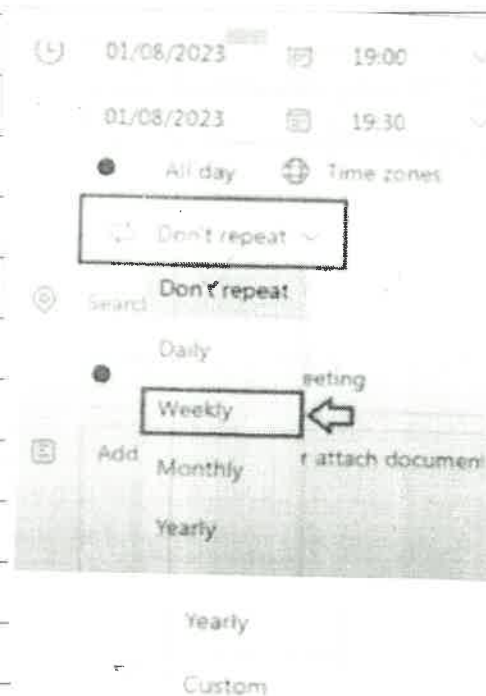

- 2) In the Add Title field, enter agenda of the meeting. On our case agenda is "Importance of practical in BCA".

- 3) In the Invite attendees field, enter the invitees' email addresses.

- 4) For the recurring meeting, click on drop list on 'Don't repeat' tab and then select weekly tab.

- 5) Select start data, end date and days of a week for which meeting to be schedules and then click on save button.

- (b) write an email to your friends (at least 5) inviting them to attend a lecture which is to be presented to you. Make your signature and add it to the email message.
- Answer: 1) Open Outlook and go to Mail

TOPIC _____

DATE _____

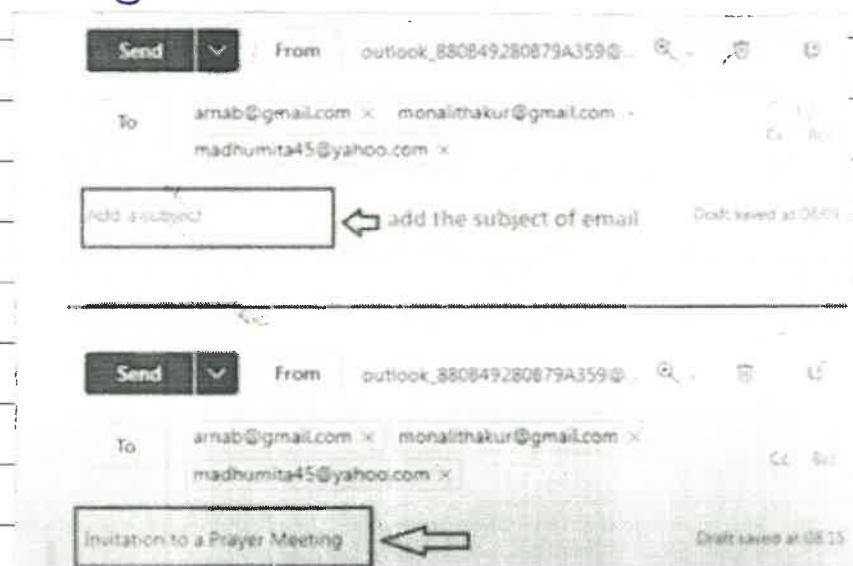

37/40

2) In the To field enter the email address of the receivers.

A screenshot of the Outlook 'To' field. The 'Send' button is on the left. The 'From' field shows 'outlook_880849280879A359@...'. The 'To' field contains 'arnab@gmail.com'. Below the 'To' field, there is a suggestion box with the text 'Add a link: Use this address: arnab@gmail.com' and a message 'No results found'.

3) In the Add a Subject section, enter the subject of the email.

A screenshot of the Outlook 'Add a subject' field. The 'Send' button is on the left. The 'From' field shows 'outlook_880849280879A359@...'. The 'To' field contains 'arnab@gmail.com', 'monalithakur@gmail.com', and 'madhumita45@yahoo.com'. The 'Add a subject' field is highlighted with a red box and an arrow pointing to it. The text 'add the subject of email' is written next to the field. The 'Draft saved at 08:03' message is visible on the right.

4) In the Body section of the email, write the invitation message.

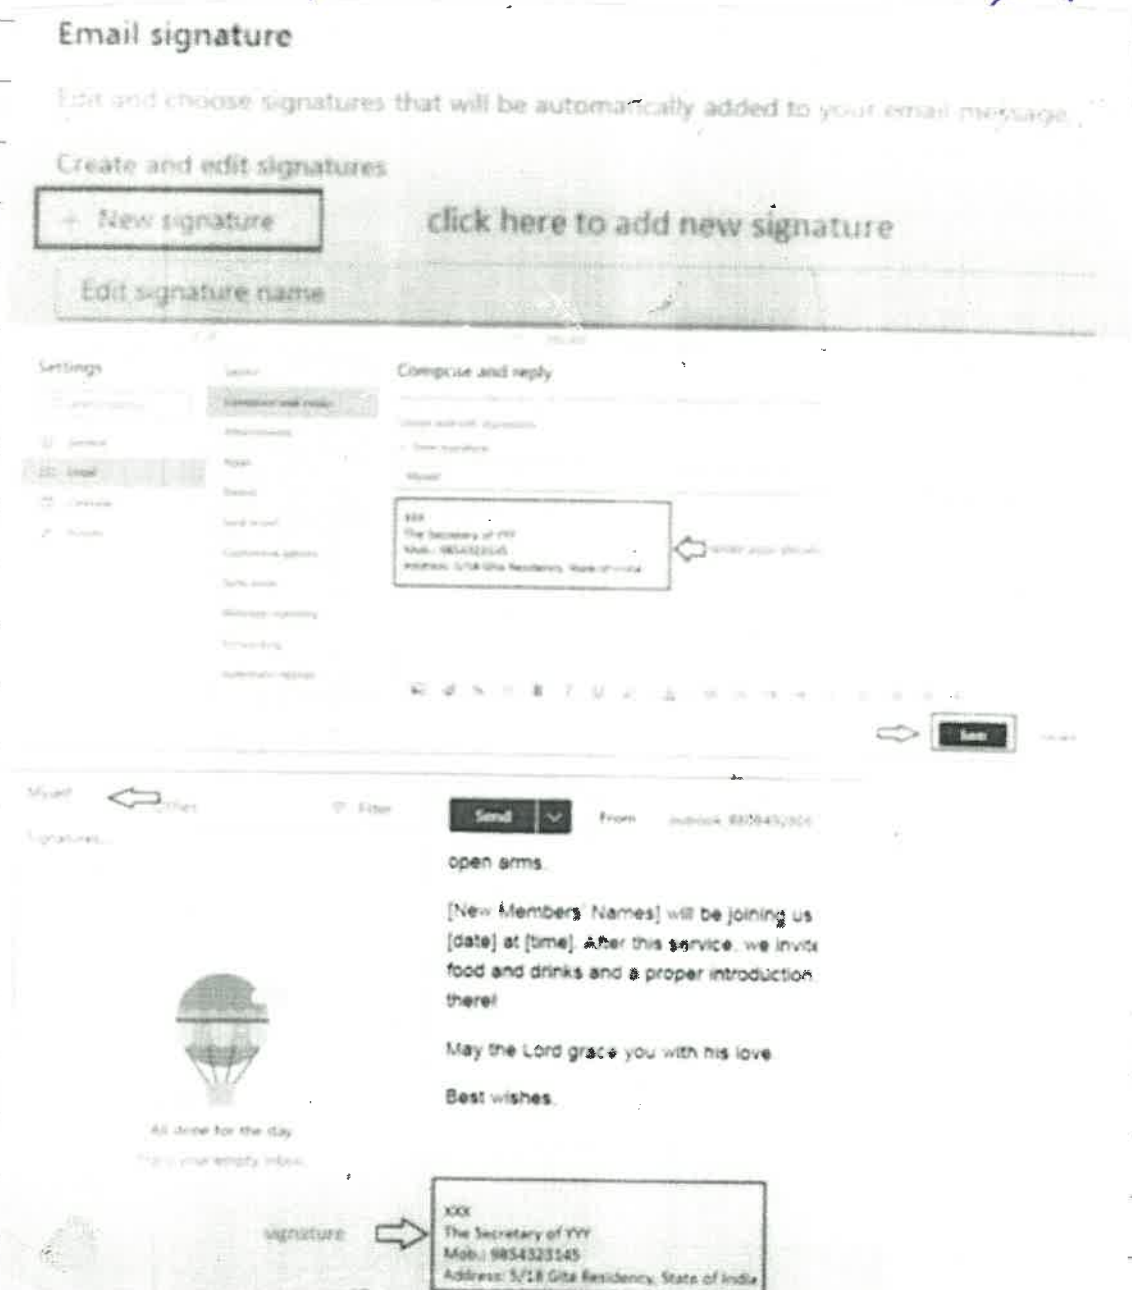

A screenshot of the Outlook email body. The 'Send' button is on the left. The 'From' field shows 'outlook_880849280879A359@...'. The 'To' field contains 'arnab@gmail.com', 'monalithakur@gmail.com', and 'madhumita45@yahoo.com'. The 'Add a subject' field is highlighted with a red box and an arrow pointing to it. The text 'write the body of the email' is written next to the field. The 'Draft saved at 08:13' message is visible on the right. The email body text is: 'Dear Members. We are delighted to welcome new members. [Names] into our community at YYY [Community Name]. Seeing our community grow is a true blessing. We would like to give you the opportunity to meet our newest members and welcome them yourselves with open arms.'

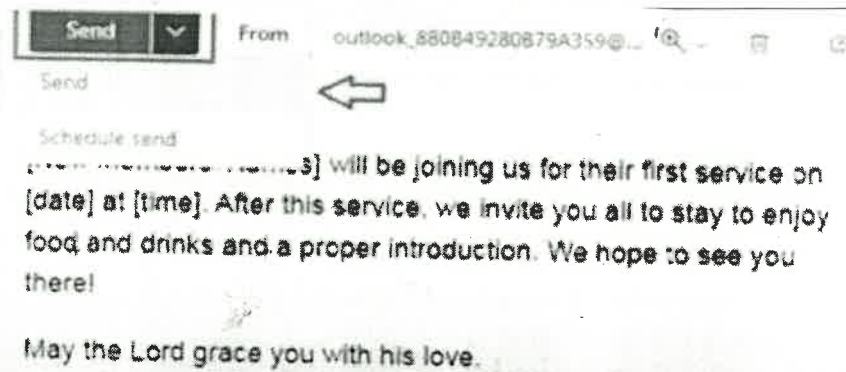

- (5) To add signature to the email message, click on the insert tab and then click on to the signature.

- (6) To create signature, click '+ New signature'

- 7) At last click on send button to send the invitation mail to the recipients.

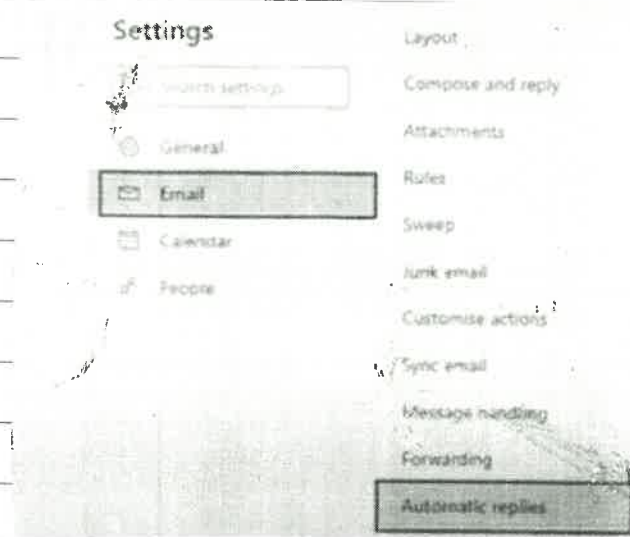

- c) Create a vacation/ holiday message that should be sent to all the emails received by you in a vacation week (say 5th December, 2024 to 12th December, 2024, or 7th June, 2025 to 15th June 2025).

Answer:

- 1) Select File > Automatic Replies.

- 2) Select send automatic replies.

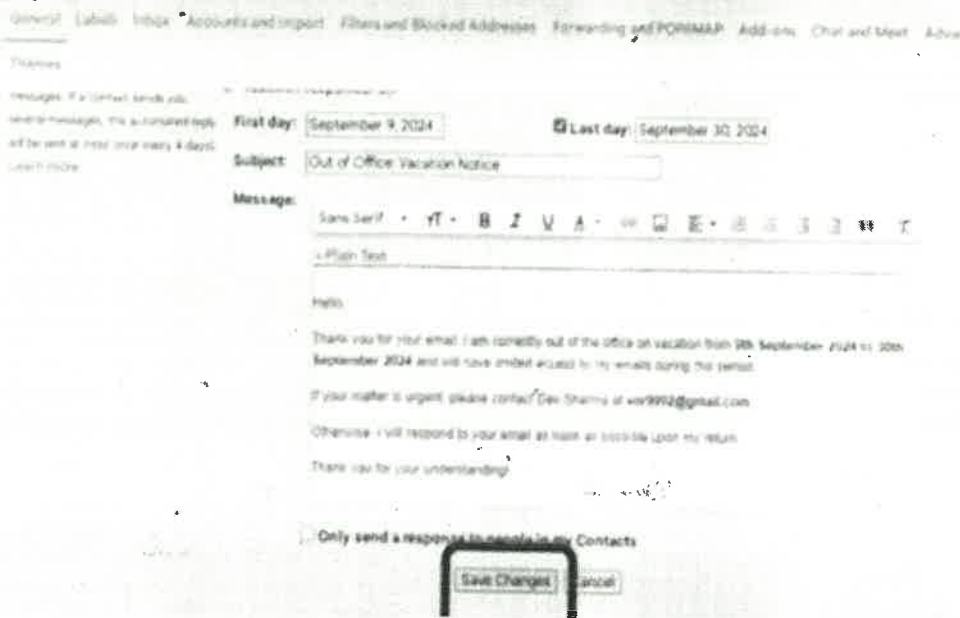

- 3) Choose the dates and times you'd like to set your automatic reply for.

First day: September 9, 2024

☒ Last day: September 30, 2024

Subject: Out of Office: Vacation Notice

- 4) Type in a message. You can format the text using the tool bar, or cut and paste text you've formatted, including hyperlinked text.
- 5) Select Save.

d) A person is sending several emails to you which you want to delete automatically. Configure your mail account to achieve this functionality in your mailbox for a specific email id.

Make and state suitable assumption, if any.

Write the sequence of steps that you have performed in different parts of this questions. Also attach printout OR a file (may be in pdf format) containing the screen shots of the output.

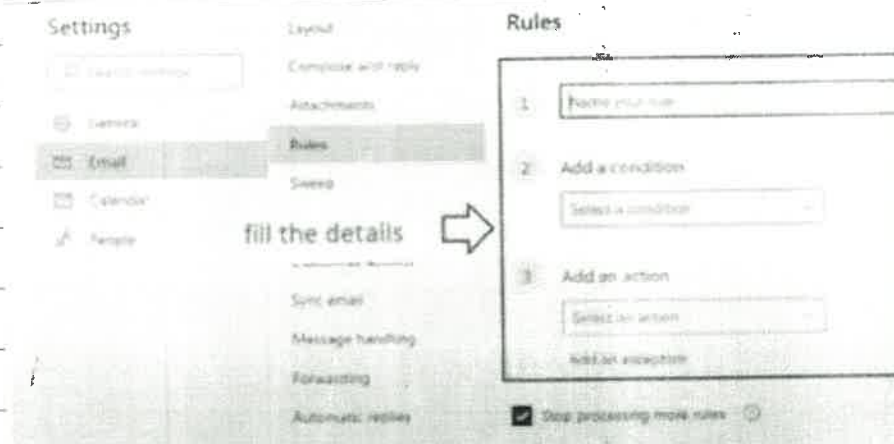

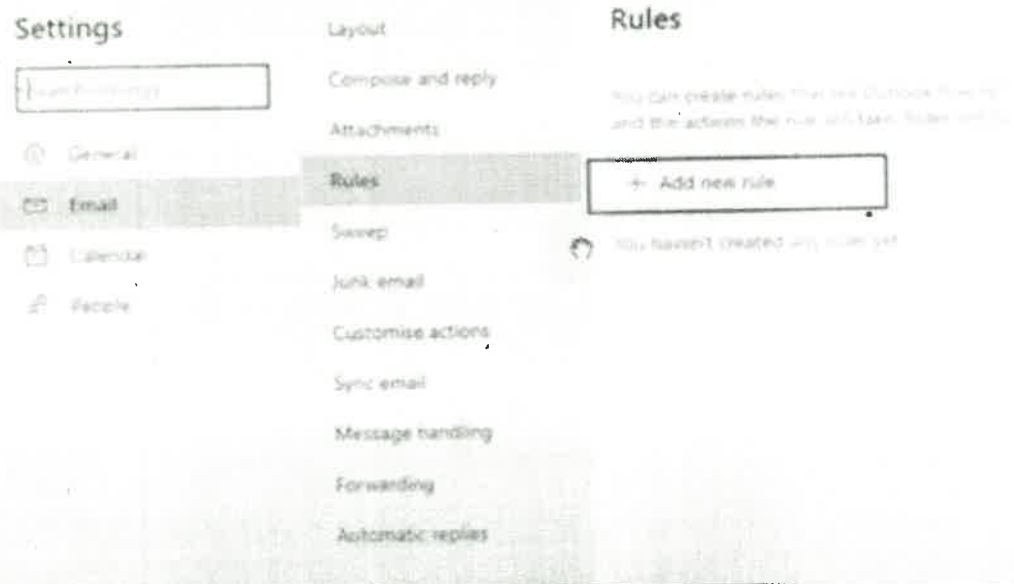

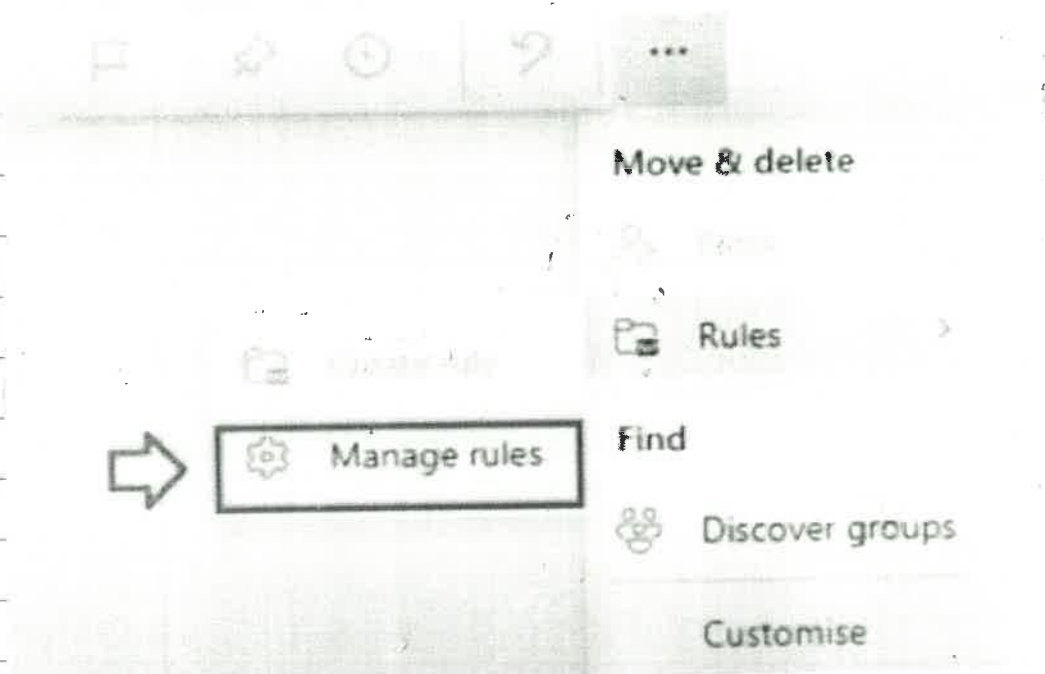

Answers: Outlook automatically deleting emails, we can do so from setting → View all Outlook settings → Email → Rules → Add new rule when using the web version of office Outlook 365.
